

## 600W wind and solar hybrid controller

### Features:

- PWM charging
- Automatic braking of wind turbine by over-voltage and over-current protection
- Protection against battery over-charging and over-discharging
- Easy to check basic parameters from LCD display
- Manual brake
- Two DC Load output, light control, time control, constant output, and multiple output control mode selections.

### Technical Specifications

Model	HY-WSC06-48AWM
<b>Rated Battery Voltage</b>	48V
<b>Rated Power Output of Wind Turbine</b>	600W
<b>Maximum Power Output of Wind Turbine</b>	900W
<b>Rated Power Output of Solar Panel</b>	300W
<b>Stop Charging Voltage</b>	58V
<b>Recover Charging Voltage</b>	52.8V
<b>Brake Current of Wind Turbine</b>	13A
<b>Battery Over-discharge Protection Voltage</b>	43.2V
<b>Battery Over-discharge Recovery Voltage</b>	48V
<b>Battery Over-voltage Protection</b>	64V
<b>Light Control On Voltage (Factory Default )</b>	2V
<b>Light Control Off Voltage (Factory Default)</b>	3V
<b>Rated Output Current of Load 1 and 2</b>	10A
<b>Load 1 Output Control Mode(Factory Default)</b>	3 optional modes (light-control on and off)
<b>Load 2 Output Control Mode(Factory Default)</b>	3 optional modes (light-control on and time-control for 5 hours)
<b>Display Mode</b>	LCD
<b>Quiescent Current</b>	≤20 mA
<b>Ambient Temperature &amp; Humidity Range</b>	-20~+55°C/35~85%RH (non-condensation)
<b>Communication Function (optional)</b>	RS232, RS485, RJ45, GPRS (optional)
<b>Measurement (L x W x H)</b>	142×150×82mm
<b>Net Weight</b>	Gross Weight 2kg 3kg
