

SWIM SPA TREATMENT

ALWAYS PREMIX SWIM SPA TREATMENT IN ONE GALLON OF FRESH WATER. POUR THE MIXTURE AROUND THE PERIMETER OF THE WATER. RUN ALL SPA JETS FOR FIVE MINUTES TO DISTRIBUTE PRODUCT EVENLY.

Dosages Based On 2000 – 3000 Gallon Swim Spa Capacity

1. Add 1/2 ounce of **Swim Spa Treatment** to water for the initial dose.
2. Every two weeks thereafter: add 1/4 ounce of **Swim Spa Treatment** to spa water. (Reduce or skip dosage if swim spa is not used regularly or not at all during the prior two week period.)
3. Install a clear choice **Filter Sleeve** on swim spa cartridge filter for best results.
4. Rinse swim spa cartridge filters and **Filter Sleeves** weekly using clean water and a good spray nozzle. Monthly: remove swim spa cartridge filters and **Filter Sleeves**; soak in clean water and five cups of white vinegar overnight. Rinse well and reinstall before using spa.
5. If hard scale deposits on the shell or flakes in the water develop, reduce and maintain the pH to roughly 7.6 using any standard pH reducer from your local store. A pH of 7.6 – 8.4 is normal with the Clear Choice system.
6. **Spa Prep**: Add (2) 8oz. to swim spa water and follow bottle label directions to clean swim spa prior to switching to the **Clear Choice Swim Spa Treatment System** and/or complete water changes. Let the Swim Spa circulate after adding Spa Prep for 1-2 days before completing your water change. New swim spas can skip this and just start with fresh water and the Swim Spa Treatment as directed on the bottle and top of page here.

FILTER SLEEVE DIRECTIONS

The Filter Sleeve enhances the filtering efficiency of the standard cartridge filter in your spa. It is designed to work with our Natural Swim Spa Water Treatment System.

DIRECTIONS: Remove the spa cartridge filter from your spa. Wrap the Filter Sleeve around the spa cartridge filter and secure it firmly with the attached fabric ties. Reinstall the unit in your spa.

The Filter Sleeve is designed to fit most spa cartridge filters. The sleeve is based on area coverage and may or may not cover your entire spa cartridge filter.

Clean the Filter Sleeve weekly by spraying with high pressure water from your sink or garden hose. Monthly: Soak the sleeve in 1 cup of white vinegar for 1 hour, rinse well and then reinstall in spa.
