Kitchen & bathroom fittings

made for simple living

With over twenty years in architecture and interiors, designing spaces and creating brands, I've become very aware of architectural products that could do with a little more design consideration.

Mess fittings are designed by focusing on what is essential, and making sure those essentials are the best they can be. Considered materials and fixings and a refined colour palette. These are everyday objects that quietly enhance your space.

Founder

Customer reviews

The products you are creating seem to find that perfect balance between form and function....Your (shower) shelf design is simple but so deeply considered.

Laura Wingrove
Johannesburg

First batch is working brilliantly, invisibly, which was the precise goal.

Carolyn Jones
Guest house owner, Worcester

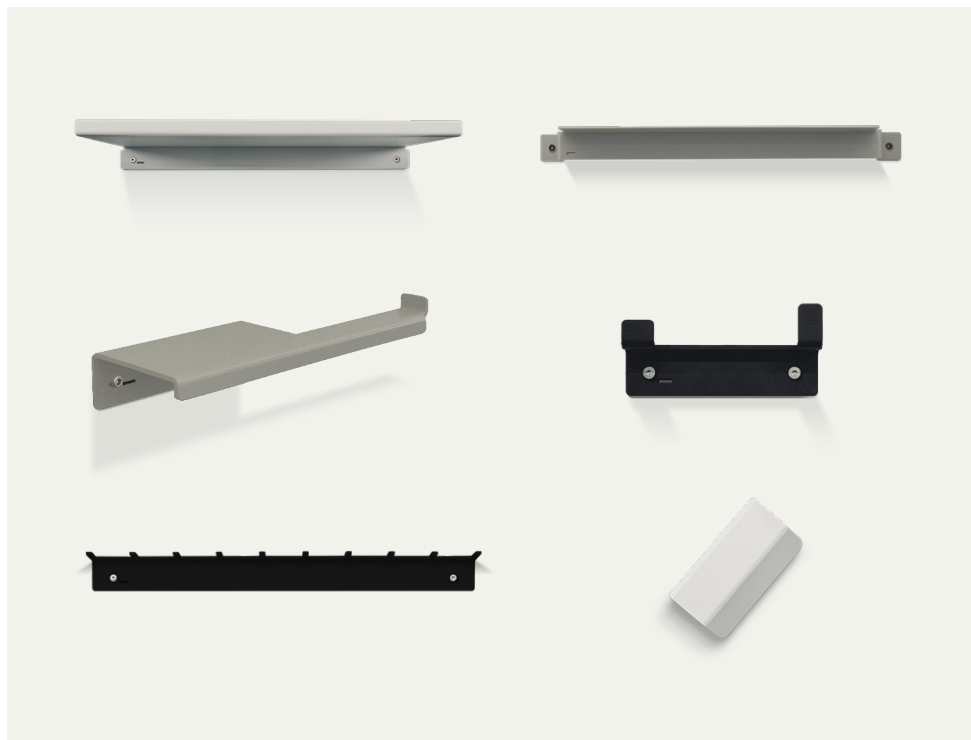

Thank YOU for making such sublime accessories

Nicola Ashe
TDMC Marketing, Durban

Thanks received and love my order – have ordered more.

All fittings are made from aluminium, making them highly corrosion-resistant and earth friendly.

Selected fittings shown
 Lipped shelf / Towel rail
 Toilet roll holder / 2hook
 Utility hook / Cabinet handle

SO BIN

These wall-hung bins are green in every way except colour. They're made of aluminium, are sized to fit SO (Self Opening) brown paper bags, and they're designed and made in SA.

The SO35 bin fits supermarket delivery bags as used by Woolworths DASH, Checkers Sixty60, PnP asap! & Spar2U. The SO12 bin fits standard SO 20 & SO 25 size brown bags. Both bins also fit Woolworths 17L drawstring pedal bin liners

2 lid styles available - solid or with a circular hole.

SO12 220W x 145D x 450H (Lid hole 75Ø)

SO35 350W x 210D x 540H (Lid hole 105Ø)

House Ashe

CABINET HANDLE

A discreet cabinetry door or drawer handle, designed to almost disappear when paired with door or drawer fronts of a similar colour. They're screw-fixed either horizontally or vertically to the inside face of your drawer and door fronts.

75/150L x 40D x 20H

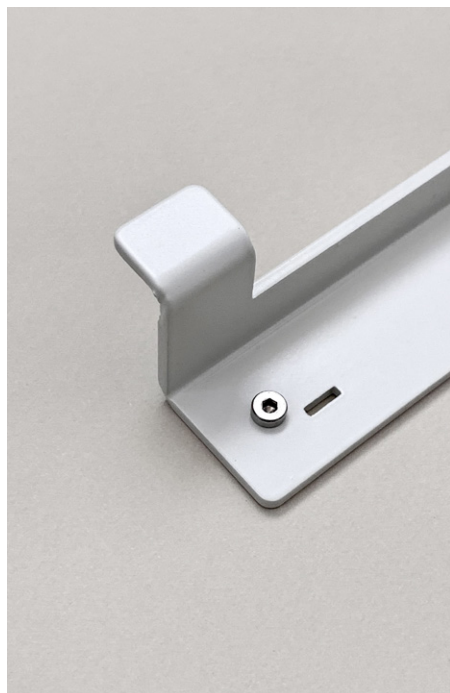

UTILITY HOOK

Hang brooms, dustpans and other cleaning tools inside a broom cupboard, or kitchen prep tools directly over a kitchen counter.

450L x 45D x 45H

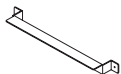

2HOOK

A simple hook for your most used kitchen tools, dish towels or anything that doesn't deserve to be hidden in a drawer. Use it in the bathroom for a shaving mirror, shower squeegee or hand towel.

125L x 30D x 50H

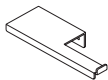

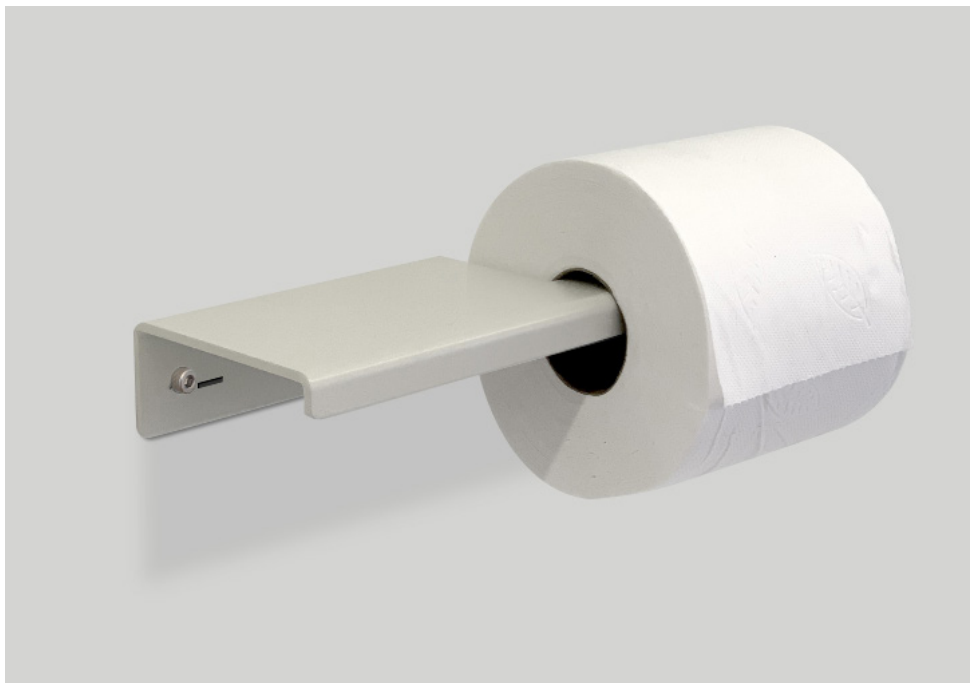

TOWEL RAIL

Available in two lengths, the short rail is long enough for a folded bath sheet/towel, and the long rail is long enough for an unfolded bath sheet/towel or 2x folded bath sheets/towels.

The deep, flat rail surface means that a towel hangs with an air gap which makes for better drying.

530/980L x 75D x 35H

TOILET ROLL HOLDER

No moving parts, just a single piece of aluminium.
With a small shelf surface that is long enough to hold
a mobile phone so you'll never be out of touch.

230L x 85D x 35H

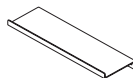

SHOWER SHELF

Showers are small spaces, so shower shelves should be slim and sturdy. Ours is made for the bare essentials, with a draining slot and 2 discreet hooks underneath for loofahs, sponges, or a squeegee.

450L x 83D x 35H

LIPPED SHELF

The perfect 'above-counter' kitchen or bathroom shelf. Deep enough to hold glasses, smaller crockery, or framed artwork. The bracket of the shelf acts as the perfect spacer ensuring a 10mm gap between shelves if arranged together.

450/600/900L x 140D x 35H

WINE RAIL

Everyone loves wine. Show your wine just how much you love it by storing and presenting it properly. The wine rail fixes to a wall and holds up to 6 standard 750ml wine bottles vertically. 6 bottles is never enough so add as many as you need - they will read as one continuous rail when fixed alongside one another.

510L x 65D x 300H assembled
