

Tiny Terrarium Necklace Care

Your unique tiny terrarium necklace is composed of glass and sterling silver or 14kt. gold-fill. As it is fragile, please take care to avoid scratching or dropping your necklace. You can remove smudges by polishing the glass gently with a microfiber cloth. If needed, you can polish the chain with a silver polishing cloth.

Please note that your necklace is NOT waterproof. Do not immerse in water or other liquids; remove before showering.

Occasionally, slight condensation may form on the inside of the glass when exposed to prolonged sunlight or heat. This is normal for hollow glass accessories and will not harm your necklace. If this should occur, just place your necklace in a cool location until condensation clears.
