<sup>\*</sup> based on intermediate riding skills; if you are advanced/pro you can choose I size smaller

## User Info:

## $This \ River \ Board finder \ is \ based \ on \ hundreds \ of \ hours \ of \ experience \ from \ our \ network \ of \ team \ riders, \ partners \ and \ customers.$

But as local conditions change and as new waves enter the rapid surfing community, it's under constant development.

Should you have any new insights or updates for us to optimize this document, please get in contact with us.

<sup>\*\*</sup> based on average water levels (m3/s) – for lower pressure it's more fun to ride the bigger size

<sup>\*\*\*</sup> for Plattling: we recommend 2 sizes smaller than indicated above (due to the wave shape with its very tight transition at lower water levels & enough pressure at higher level
