EMPOWER CANNABIS COMMUNITY WITH DIVERSE AND
INNOVATIVE VAPING DEVICES

www.ciliconplus.com

DEFINING AND UPGRADING CANNABIS VAPORIZATION

CILICON is established with one dream to be fully committed and improve the daily lives of our clients through our innovative vaping technology. We are equipped with world-class facilities to develop a comprehensive cannabis vape entity with efficient technology and product R&D, high-quality manufacturing, and competent customer service.

Amid the "Bad Money Drives Out Good" market dilemma, many low-quality counterfeit products circulating in the market. Those products are claimed to be harmful to our clients. Therefore, CILICON takes extra precautions to combat such a dilemma. We have integrated our comprehensive value chain system to establish a phenomenal professional cannabis vape solution platform. CILICON DESIGNED, is tailored to reduce customer investment of time and capital. Our brand aims to differentiate and specify our clients' demands by providing exclusive premium products to all cannabis companies.

At CILICON, we provide professional cannabis vape solutions to our driven international clients through innovative technology and a wide variety of products. We always welcome our clients and help them to increase their brand competitiveness. CILICON will never compromise on the quality and safety of our products. We always prioritize our customer satisfaction while we are dedicated to becoming the world's most iconic cannabis vape device provider. The success of your brand is our topmost priority.

A GLANCE ON CILICON

OUR ADVANTAGES

01

ON TIME, UNDER BUDGET

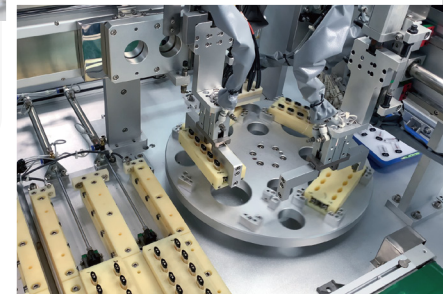

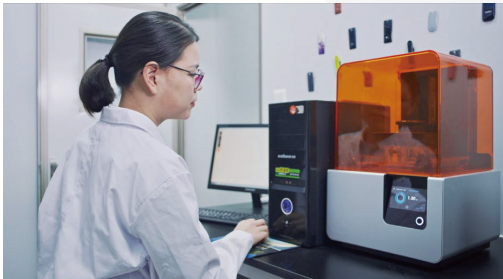

02

YEARS OF MANUFACTURING EXPERIENCE

03

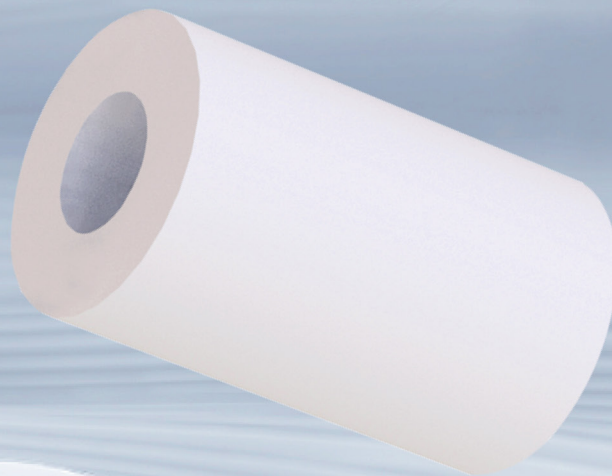

ALL-AROUND TECHNOLOGICAL SUPPORT

04

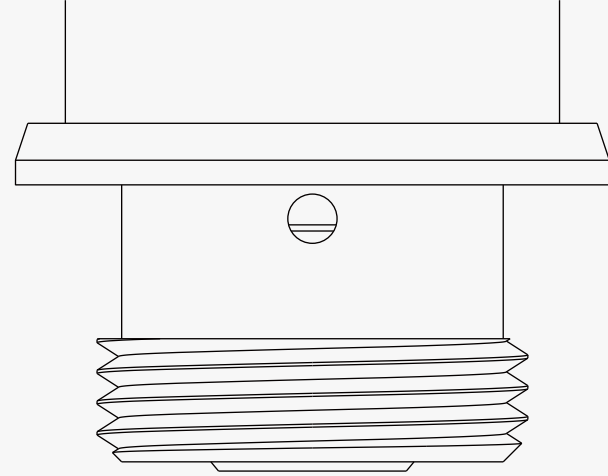

NOT JUST A MANUFACTURER, BUT ALSO A PROFESSIONAL SOLUTION SUPPLIER.

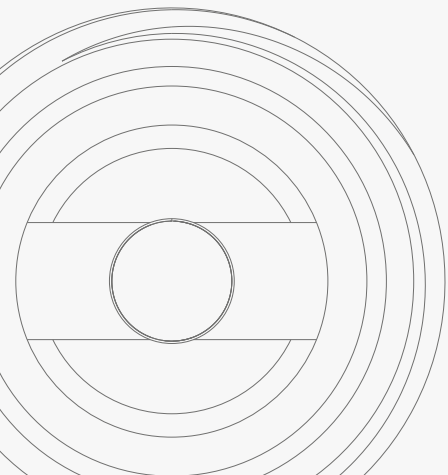

SAFE & SUPERIOR VAPING EXPERIENCE DRIVEN BY FORMATRIX™

We employ pure, durable, high-quality raw ceramics and industry-leading patent ceramic heating technology – Formatrix™ to produce a brand-new heating engine, that allows users to consume cannabis oil with superior and safe vaping experience.

510 CARTRIDGE

A 510-thread cartridge is the most common type of vape cartridge. "510" refers to 10 threads at 5mm, describes the type of threading that is used to screw the bottom of the cartridge to the appropriate vape battery.

LONG BATTERY LIFETIME & STEADY PRODUCT PERFORMANCE

How to prolong the life-time of the battery and raise the charge efficiency? Cilicon employs pure LiCoO₂ battery with high quality and designs a steady product structure to ensure an excellent performance of battery, that allows for the safeness in vaping.

BATTERY

Batteries work with 510 Cartridges. The vape battery will power an atomizer in the cartridge that heats up the oil, be activating the vaping journey.

THE ANSWER TO HOW COME CILICON TAKES 39.8% OF DISPOSABLE MARKET SHARE

The more recognizable and stylish industrial design embodies the unique aesthetic value of Cilicon, that leads the fashion trend in the industry. In addition, the superior product stability brought by more sophisticated structure allows for more high-received value for brand-building.

DISPOSABLE

Disposable contains a pre-charged battery designed to support the device until the cart empties. They contain no threading and are not meant to be separated from their battery, and meant to be disposed of after use.

SMALL POD BIG EXPERT

Combining a variety of brand-new technologies, we design a multi-functional and top-class pod system. Excelling in preserving the authentic aroma of your terpene profile and delivering maximum potency, it is a truly marvelous creation by a group of proud pioneers.

POD

POD SYSTEM

Pod System contains a battery housing unit that is rechargeable and meant to be kept by the user, and a “pod” that is filled with concentrate and can be easily dropped into the battery housing unit in order to vape. Once the “pod” is empty, the user simply removes and swaps in a brand new fully filled pod.
