

## First Things First.

After you print, measure this line with a ruler. If it is exactly three inches long, great! If not, you might need to check the settings on your printer to make sure that scaling is set to “none” and you are printing at full size.

## Option 1: Cut out this sizer and wrap it around your finger.

Wrap the sizer around the widest part of the finger you'll wear your ring on. The number the arrow lands on is the correct size. If it seems a little snug, increase your measurement to the next half-size.

## Option 2: Use a ring you already own.

Already have a ring that fits comfortably? Place it over the circles below! The one that fits closest to the inside edge of your ring is the size you should choose. If you're between sizes, choose the larger size.

## Option 3: Use a piece of string and a ruler.

Wrap some string or dental floss around at the widest part of your finger, then measure that length in millimeters. Use this chart to convert that measurement into your ring size. Again, if it seems snug, move up half a size.

Size 1 - 39.1mm	Size 4.5 - 47.8mm	Size 8 - 57.2mm	Size 11.5 - 66.0mm
Size 1.5 - 40.4mm	Size 5 - 49.0mm	Size 8.5 - 58.4mm	Size 12 - 67.2mm
Size 2 - 41.6mm	Size 5.5 - 50.3mm	Size 9 - 59.7mm	Size 12.5 - 68.5mm
Size 2.5 - 42.9mm	Size 6 - 51.7mm	Size 9.5 - 60.9mm	Size 13 - 69.7mm
Size 3 - 44.0mm	Size 6.5 - 53.1mm	Size 10 - 62.2mm	Size 13.5 - 71.0mm
Size 3.5 - 45.2mm	Size 7 - 54.3mm	Size 10.5 - 63.5mm	
Size 4 - 46.5mm	Size 7.5 - 55.6mm	Size 11 - 64.7mm
