PLEASE READ

For precise measurement, ensure this document is printed at 100%. To achieve this, deselect the “fit to page” option in your dialogue box and set the page to 100% or actual size. Refer to the ruler provided (in method number 1) to confirm the accuracy of the 3.5 inch or 8.9cm line. **Important:** Do not measure on a screen; the document must be printed. Sizes obtained from this page are approximate and might require adjustments.

METHOD 1. Printable Ring Sizer

1. Enhance the durability of the ring sizer stencil by applying a strip of clear tape over it.
2. Use a blade to carefully cut a slit next to the letter “A” marked or where the “read size here arrow points” and then continue to follow along the stencil's perimeter until it is completely cut out.
3. Position the ring sizer over the widest part of your selected finger (typically the knuckle) with the letters facing outwards.
4. Thread the end of the ring sizer through the designated slit.
5. Your ring size corresponds to the letter aligning with the slit.

Reminder: Ensure the size comfortably slips over your knuckle; if you fall between two sizes, opt for the larger one.

SEE NEXT PAGE FOR FURTHER SIZING INFORMATION

METHOD 2. Existing Ring Sizer

1. Select a ring from your current collection that comfortably fits on the intended finger for your new ring.
2. Position the chosen ring over the circle provided.
