

18個月健康 嬰兒計劃

18-month Well
Baby Programme

18個月健康嬰兒計劃 18-month Well Baby Programme

不少父母一方面對新生兒的降臨感到十分高興，但另一方面卻對孩子的健康不禁憂心，腦海中經常浮現「我的寶寶身體健康嗎？」「我的寶寶發育健全嗎？」等種種憂慮。正因如此，持續有效地監察嬰兒的身體成長和發展里程碑對父母來說非常重要。

事實上，除了監察嬰兒的成長及提供適當訓練外，父母還需保護嬰兒免受嚴重疾病感染。完美的小生命呱呱落地，由於身體尚未發育成熟，令他們未有足夠免疫能力抵禦細菌或病毒的入侵。注射疫苗可有效幫助嬰兒增強自身免疫系統，從而抵禦外來感染，因此父母應及早為嬰兒接種疫苗以增強對他們的保護。

誰應參與此計劃？

1-18個月大的幼兒

Parents are so pleased and excited to receive their new born baby. “Is my baby growing well?” “Is my baby’s development appropriate?” These questions are in parents’ minds every day. Continuous monitoring of baby’s physical growth and developmental milestones they can achieve is therefore very important.

Apart from monitoring and training them, we also need to prevent the babies from catching serious infections. Babies look so perfect but yet so pure and immature that they are not ready to face all the challenges in the world. Their bodies are not equipped with enough natural defence to bar or combat the invasion of disease germs. In order to offer adequate protection to them, parents should have their children vaccinated to fortify their immune systems. Vaccines against disease germs can prepare the body’s immune system and hence help the body prevent or fight infections.

Who should join the Well Baby Programme ?

Children aged 1 - 18 months old

18個月健康嬰兒計劃 18-month Well Baby Programme

兒科專科醫生評估 Check-up Items

兒科專科醫生評估和檢查共7次 (每次注射疫苗前及第15個月額外評估和檢查)
 7 consultations by paediatrician (before each vaccination and an additional assessment and checkup at 15 months)

疫苗接種及處方口服退燒藥
 Vaccinations and Paracetamol Oral Liquid to be prescribed

年齡 Age	疫苗項目 Vaccine	
一個月 1 Month	乙型肝炎 Hepatitis B	第二次 Second Dose
兩個月 2 Months	五合一混合疫苗 (白喉, 破傷風, 無細胞型百日咳, 小兒麻痺、B型流感嗜血桿菌) 5 in 1 vaccine (DTaP, POLIO, H.I.B.)	第一次 First Dose
	肺炎鏈球菌 Pneumococcal	第一次 First Dose
	輪狀病毒口服疫苗 Oral Rotavirus Vaccine	第一次 First Dose
四個月 4 Months	五合一混合疫苗 (白喉, 破傷風, 無細胞型百日咳, 小兒麻痺、B型流感嗜血桿菌) 5 in 1 vaccine (DTaP, POLIO, H.I.B.)	第二次 Second Dose
	肺炎鏈球菌 Pneumococcal	第二次 Second Dose
	輪狀病毒口服疫苗 Oral Rotavirus Vaccine	第二次 Second Dose
六個月 6 Months	六合一混合疫苗 (白喉, 破傷風, 無細胞型百日咳, 小兒麻痺、B型流感嗜血桿菌、乙型肝炎) 6 in 1 vaccine (DTaP, POLIO, H.I.B., Hepatitis B)	第三次 Third Dose
十二至十五個月 12-15 Months	麻疹、流行性腮腺炎及德國麻疹 MMR	第一次 First Dose
	水痘 Varicella	第一次 First Dose
	肺炎鏈球菌 Pneumococcal	加強劑 Booster Dose

年齡 Age	疫苗項目 Vaccine	
十八個月 18 Months	五合一混合疫苗(白喉,破傷風,無細胞型百日咳,小兒麻痺、B型流感嗜血桿菌) 5 in 1 vaccine (DTaP, POLIO, H.I.B.)	加強劑 Booster Dose
	麻疹、流行性腮腺炎、德國麻疹及水痘 MMRV, Varicella	加強劑 Booster Dose
價格 Price HK\$ 16,800
