

HOW TO CLEAN THE BLINDS & SHADES

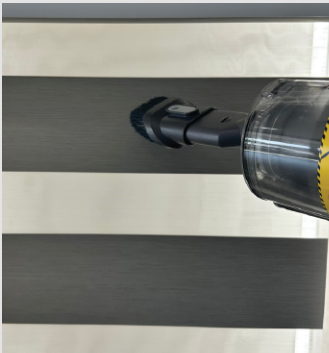

CAUTION! DO NOT WASH!

Duster

Hold the duster firmly and swipe it across the surface of the shades, making sure to reach between the alternating stripes to remove dust and debris.

Vacuum

Gently run the brush attachment along the surface of the shades, starting from the top and working your way down, using short back-and-forth motions to capture and remove dust and dirt effectively.

Spot Cleaner

For tougher marks and stains, use a damp sponge or cloth with fabric cleaner, gently wiping the affected area, and allow the blind to fully dry in the extended position.
