

# MAKE YOUR OWN FLAT CAT

CAT BUTT

## SUPPLIES:

- A printer
- Some cardboard
- Scissors, X-acto knife, or something to cut with
- Tape
- Glue - Elmer's, a glue stick, spray mount, etc.
- Cat food (optional)

## LET'S GET STARTED:

**1.** For a full-size cat, print all 3 pages at 100%.  
If you want a smaller cat, that's cool too.

Now, review your components. You've got a  
cat butt (page 1), a cat front (page 2), and an  
easel (page 3).

*(continued on page 2...)*

**SCALE CHECK:** This box should measure  
1/2" x 1/2" when printed at 100%.

CAT FRONT

**2.** Using the inside of the dotted line as your guide, cut out the cat front, cat butt and easel.

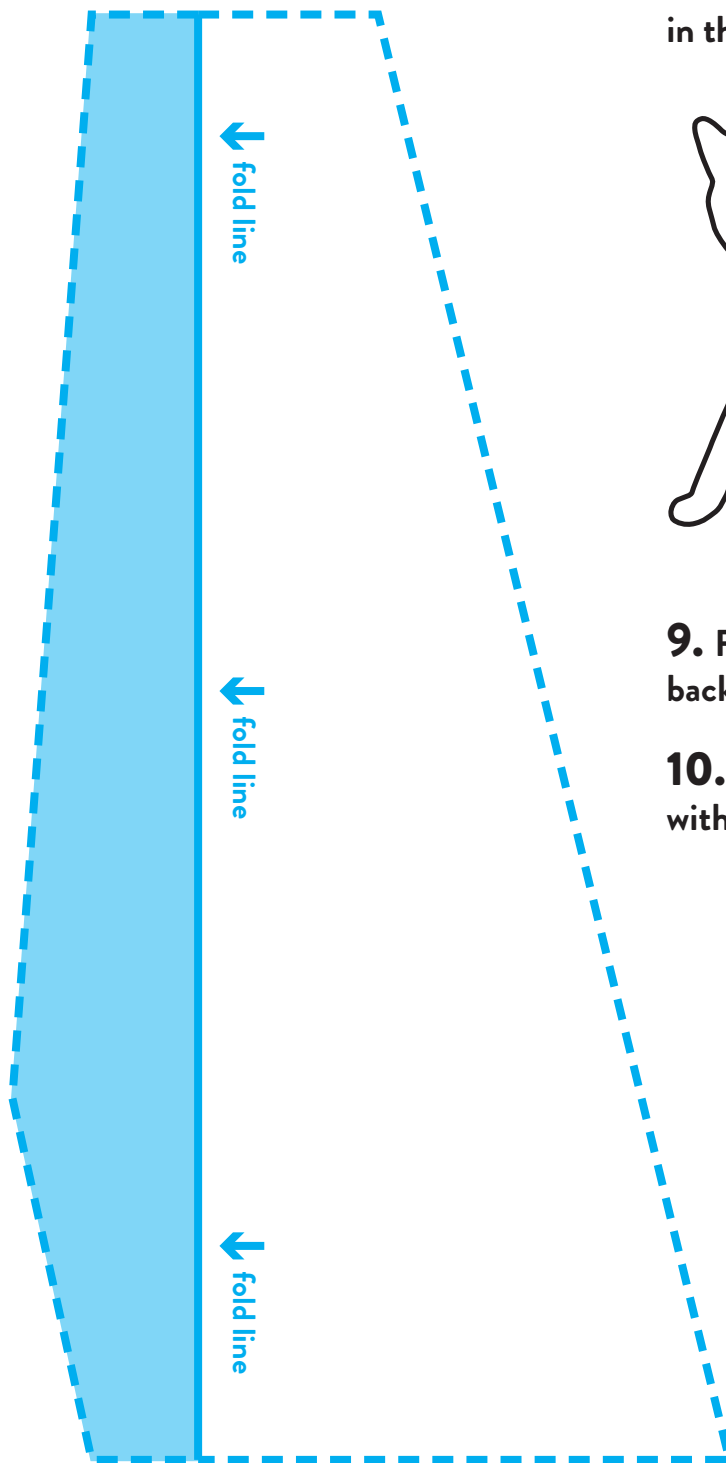

**3.** “Tile” the cat front and cat butt. (That just means line them up and tape them together.)

**4.** Glue your tiled cat and your easel to the pieces of cardboard.

**5.** Now, cut out the mounted cat and easel. Yes, you’re cutting out the cat and easel *again*. Be careful! Cardboard can be hard to cut!

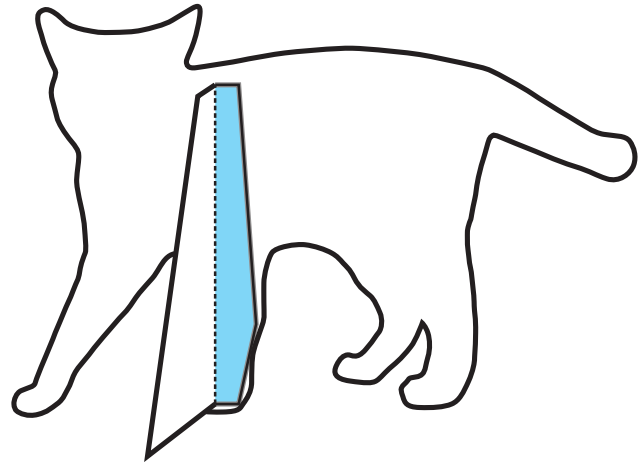

*(continued on page 3...)*

**6.** Grab the easel piece and “score” along the fold line. (That just means gently press your blade along the line, but don’t cut all the way through.)

**7.** Now it’s time to assemble your pet! Place the cat and the easel on your work surface, with the printed side facing down.

**8.** Glue or tape the shaded section of the easel to the back of the cat’s leg as shown in this illustration.

**9.** Fold the standing section of the easel back so that it supports your cat.

**10.** Brag about all the fun you’re having with your new pet! [#BlueQFlatCat](#)

**EASEL**
