

CEMBRE HT-TC0851 Hydraulic Cutting Tool

The tool features a double speed action: a fast advancing speed for rapid approach of blades to the cable and a slower more powerful speed for cutting.

Hand operated hydraulic tool specifically designed to cut copper, aluminium and tele-communications cables having a max overall diameter up to 3-3/8 in (85mm). This model is self contained, robust and sturdy.

The blades are manufactured from high strength special steel, heat treated to ensure a long service life. The head can easily be opened to allow the cutting of running cables, and can rotate by 180 degrees, to enable the operator to work in the most comfortable position. HT-TC0851 features an automatic safety valve to bypass oil when reaching maximum pressure; a pressure release device can also be operated at any stage of operation.

Technical Features:

Properties

- Width 175 mm
- Length 625.5 mm
- Weight 6.6 kg
- Maximum cutting diameter 85 mm
- Type of action Cutting
