

THE LEMOND REVMAS^TER PRO

Infinitely adjustable for a true bike fit.

The latest exercise bike from legendary cyclist Greg LeMond comes with a set of sophisticated upgrades designed to maximize comfort and withstand the rigors of the club environment. Unlike any other group cycling bike, the RevMaster Pro allows for four-way adjustability of the height and fore-aft, with micro-adjustments possible on the seat and handlebars. Combined with a narrow crank width, this ensures a customized fit that accurately replicates a road bike—for even the most discriminating riders. The next-generation x-frame features greater corrosion resistance, and modular assembly pieces promise long life and ease of service.

LEMOND REVMASTMTER PRO

THE NEXT GENERATION OF INDOOR CYCLING BIKES.

The LeMond RevMaster Pro offers a unique set of upgrades from previous models, providing maximum riding comfort. Designed as the successor to our original bike, it integrates a narrower crank to more closely replicate the feel of an outdoor bike.

At LeMond, one of our paramount goals is developing bikes that provide the appropriate fit for a broad range of riders.

The RevMaster Pro has an increased range of micro-adjustability in the handlebars and seat, allowing a customized fit for even the most discriminating riders. Improved corrosion resistance, a two-piece bottom bracket cartridge and individual flywheel bearing assemblies guarantee long life and ease of service.

REVMASTMTER PILOT II — THE ULTIMATE ACCESSORY.

The RevMaster Pilot II is an optional accessory that, when paired with the RevMaster Pro, is the most effective way to measure cycling performance, displaying cadence, time and distance pedaled. The Pilot can also display heart rate and estimated calories burned when used with a heart rate chest strap transmitter (not included). The Pilot is

sold separately and is only available for use with the RevMaster Pro.

Key Features:

- Displays cadence/RPM, time, distance, heart rate* and calories*
- Coded system for no crosstalk
- Installs in 10 minutes (all components included)
- Wireless connection tracks cadence and heart rate*
- Batteries included

*When used with heart rate chest strap transmitter (not included)

100% CUSTOMER SATISFACTION.

The RevMaster Pro is manufactured to the most exacting standards, with 100% of all bikes undergoing thorough testing prior to final packaging to ensure customer satisfaction. See lemondfitness.com for warranty details.

PRODUCT SPECIFICATIONS

Height: 42"

Length: 46"

Width: 23"

Weight: 143 lbs.

Max. User Weight: 350 lbs.

Average/Estimated User Height Range: 4'10" – 6'6"

Micro-Adjust Fit

Increased adjustable range for exact fit, accommodating customized user preferences.

Improved Corrosion Resistance

Finished and tested to high standards under extreme conditions.

Kevlar Belt

Automotive-grade belt results in a smooth, quiet ride. Delivers long life and maintenance-free operation.

Custom Cranks

Forged crank and two-piece bottom bracket are designed to handle the demands of high-use applications.
