

Vehicle Fitting List

VEHICLE FITTING INFORMATION ISOFIX FITTING METHOD OR USING THE 3-POINT BELT

This car seat with base is classified for "Semi-universal" use. It is suitable to fit into seat positions in most cars. The numbers on the diagram below correspond with the vehicle fitting positions (ISOFIX OR BELTED) listed in the following pages. If your child restraint can be fitted, it is marked with ●. If your child restraint cannot be fitted, it is marked with ○.

The left side of the diagram shows the fitting list for the ISOFIX fitting method, the right side of the diagram shows the fitting list for the use of the 3-point belt of the car. If your vehicle is not listed in this manual or it is not marked with either a [green dot] or [red hollow dot] then please refer to your vehicle's handbook or contact the manufacturer for further information. Seat positions in other cars may also be suitable to accept the child restraint. If in doubt, consult either the child restraint manufacturer or the retailer. ALWAYS give priority to the rear seats of your vehicle. DO NOT fit your child restraint onto a vehicle seat fitted with an airbag, unless it can be, and is deactivated. Death or serious injuries can be caused by an activated AIRBAG system.
