

ChatterVox for People with Quiet Speech

ChatterVox Voice Amplifiers are used daily by thousands of people in different situations who all suffer from very soft or quiet whisper speech. There are two things that are required to hear and understand someone well, you need good volume and clarity. ChatterVox systems will give you immediate help by boosting your volume significantly. You don't have to wait for the effects, it can boost your volume immediately. The most popular ChatterVox for people with quiet speech is the [Original ChatterVox Complete Plus](#), however some people prefer the lighter weight [ChatterVox Mini Amplio](#). Either one will do an excellent job and help you be heard.

The ChatterVox was originally developed specifically for a man with Parkinson's Disease. Having muffled or a quiet speech volume can be a devastating disability. Having to repeat yourself repeatedly is extremely frustrating. Worse yet, you have probably experienced situations when the person you are talking to just smiles and nods their head and you realize they didn't hear anything you just said! People with quiet, whisper speech can get an immediate boost to their speech volume so they can be heard once again, from across a room or out at a noisy restaurant.

How does it work?

The ChatterVox is a light weight, comfortable, portable voice amplifier. You simply buckle the ChatterVox amplifier around your waist and attach one of our many microphones. Turn the ChatterVox "ON" and you will hear an immediate boost to your voice volume. Adjust the volume knob to your desired volume level. It really is that simple.

How is it powered?

The ChatterVox has built-in rechargeable batteries. Simply plug the ChatterVox in to the included charger overnight while you sleep and it is good to go for all day long use.

Where can it be used?

Everywhere! The ChatterVox can be used at home around the house so that family can hear you from across the room. It can be used outside. You can use it in the car. You can use it when you go out to a restaurant or shopping. Many people use the ChatterVox with a speakerphone so they can more easily be heard on the phone.

OK, what about the cost?

The ChatterVox system is available in different packages with different microphones to best fit the individual. Our most popular system costs less than \$300.

Testimonials:

"This is a wholehearted recommendation for your product, the ChatterVox. It has changed the life of a friend of mine. Here is a brief outline of why and how he uses your product.

Through one of the volunteer organizations I belong to, I have become friends with a gentleman who is paralyzed from the neck down with advanced MS. He talks at best in a whisper and is very hard to understand even if you are only several feet away from him. It is very frustrating for both he and the people who are trying to hear him communicate. Since he is paralyzed from the neck down there is no other way for him to use other electronics to help him communicate.

I have 26 years of audiovisual production and technical experience. I am also a dealer for many brands of professional audio gear like Shure, Sennheiser, Electro-voice and JBL I set about designing an amplified system that could help this gentleman effectively communicate with people. Every combination I came up with was too big, bulky and awkward for him or his aids to easy use. After doing some additional research on-line I came across your website. I decide to call your company to find out more. I was surprised at how quickly you called back and the amount of time you spent with me over the phone discussing my specific application and needs. Even though you sounded knowledgeable over the phone I still had my doubts. I was skeptical as the price seemed almost too low for something I hoped would be good quality, durable and offer at least some improvement to help this gentleman. Boy was I wrong.

Your unit was shipped promptly and when it arrived I charged it overnight. The next morning I went over to my friends house to give it a try. Within minutes I could clearly hear him speaking. His eyes lit up like I have never seen. Your ChatterVox unit is truly amazing. The speaker unit, though very small and unobtrusive is very well built and delivers an amazing amount of volume for it's size and weight. The fact that it can run all day on one charge is surprising. The mic (we are using the optional neck mic) offers excellent quality and is very directional minimizing the amount of feedback for the low level it can pick up. It rivals some of the best professional directional mics that I buy and sell through my dealership.

You have no idea how happy my friend is now. For the past five years he has had trouble talking to people. Now he can sit amongst a whole group of people at a meeting and effectively communicate. He can sit at a table in a fairly noisy restaurant and laugh and joke with other people at the table and place his own order with the waiter. He can call to one of his aids in another room if he needs something. Everyone can hear and clearly understand him. He says that the ChatterVox has changed his life. I also agree that it has. Below is a card his aide has written for him to send to the guys who pitched in for the unit.

Thanks to you and your product. I highly recommend it and hope other people take advantage of it.

Kind Regards,"
(John from Cleveland, Ohio)
