

K-12's Leading Classroom Management Solution

GoGuardian Teacher provides educators with a view into student online activity, control over devices, and communication tools in a variety of ways to deliver instruction. With video conferencing built for K-12, Teachers can easily connect with students and keep them focused from anywhere.

Why GoGuardian

- Deliver instruction in any environment (in-person, remote, hybrid) with video conferencing built for K-12.
- Eliminate distractions and get student's screens on the same page or activity with the push of a button.
- Check attendance and engagement with detailed reporting.

Savings on average¹:

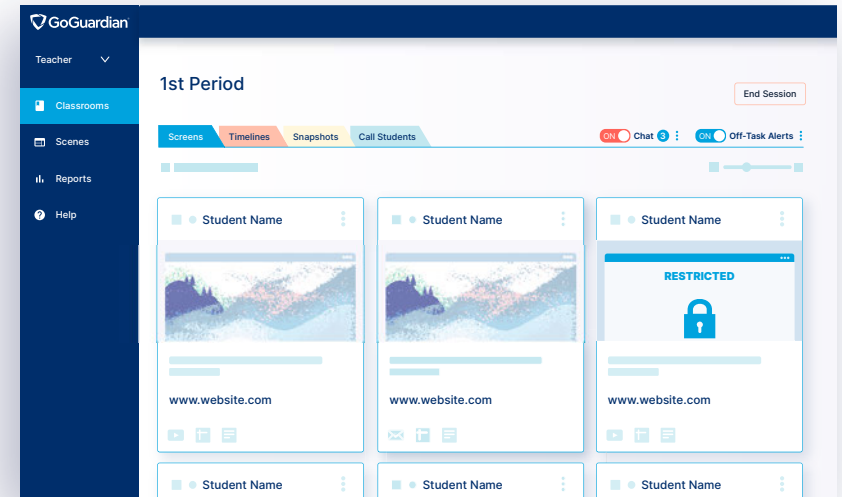

7.5 minutes per teacher each class period

24 hours of instructional time per teacher each year

\$694 per teacher each year

Key Features:

-  **Video Conferencing & Recording**
Meet with students individually or as a group, share a screen to walk through lessons, and record lessons to share later.²
-  **View Student Screens**
See what students are working on, and easily identify students who are struggling or may need more guidance.
-  **Control Student Screens**
Open tabs, close irrelevant tabs, lock screens, and screenshot student screens all with the push of a button.

-  **Limit Student Browsing**
Block specific websites while keeping the internet open, or restrict students to only certain websites—perfect for testing.
-  **Direct Chat & Announcements**
Deliver instruction to the whole class, or chat privately with individual students without disrupting the rest of the class.
-  **Off-Task Alerts**
Receive an automatic alert when a student goes off-task or off-subject.

Problem	Solution	Value
Do your teachers need to connect and deliver instruction in a way that supports their workflows in any environment while also supporting privacy and security components in a school setting?	GoGuardian Teacher offers audio and video conferencing, chat, screen-sharing, and virtual lecture options designed to support privacy components in a K-12 school setting.	Connect with students from anywhere, and deliver instruction in a way that suits both classroom and district needs.
Are your teachers able to accurately report attendance and engagement to maximize funding, without losing instructional time?	GoGuardian Teacher has detailed reporting that records student browsing during class, so teachers can check for attendance and engagement after class has ended.	Accurately report student attendance and engagement to maximize funding and instructional time during class.
Do your teachers have trouble knowing whether students are off-task or need help?	GoGuardian Teacher shows student screens in real-time, including every tab students have open, so teachers can see how students interact with the material.	Get full transparency into students' online activity, to easily identify which students are off-task or need help.
Are your teachers able to keep students focused and eliminate distractions?	GoGuardian Teacher automatically alerts teachers when students go off-task and has powerful controls to eliminate distractions, such as locking screens and closing tabs.	Quickly and easily get students back on track, keeping students focused and on-task.
Do you face difficulties implementing new solutions and struggle with low adoption among teachers?	GoGuardian Teacher offers integrations, free training, and an intuitive UI that supports many teaching styles and classroom workflows.	Teachers hit the ground running with a tool that seamlessly integrates into their classroom, maximizing adoption among teachers while saving time for your IT staff.
