LIMPANDO O SEU VERO CORRETAMENTE

- > Utilize somente **sabão neutro** e um **pano levemente umedecido**.
- > Dê preferência para panos brancos - isso evita manchas no produto.

Cuidado!

- > Não utilize produtos abrasivos (como palhas de aço, esponja de lã de aço, álcool, saponáceo entre outros) que possam riscar ou descolar a camada protetora.
- > Evite contato com produtos como sal, limão e vinagre. Eles podem acelerar a oxidação dos acessórios metálicos.
