

The Original Patented TheraSauna®

Far Infrared Health Sauna

PATENTED

MPS TOUCHVIEW™ 3.0 CONTROL

7 DAY PROGRAMMABLE CONTROLS

The Patented MPS TouchView™ 3.0 Control System
Puts You In Charge Of Your Sauna Session!

7 Day Programmable Control

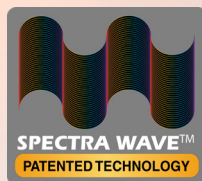

Allows you to set the desired time your sauna will turn on each day of the week. The TheraSauna® can be set to reach a certain temperature in a specific amount of time, and will save the settings for you. Your settings will be saved even if the TheraSauna® experiences a power failure.

PATENTED STABLE HEAT™

Stable Heat™ System

The Stable Heat™ System automatically maintains a constant output of far infrared heat at the 9.4 micron level. Rather than powering down, it continues to produce electricity to keep the surface temperature of the TheraMitter™ heaters constant.

SPECTRA WAVE™
PATENTED TECHNOLOGY

SpectraWave System

Allows the user to combine near, middle and far infrared wavelengths ranging from 6 to 14 microns. A visual reminder in the zone window allows you to see how the infrared waves change every 2 minutes.

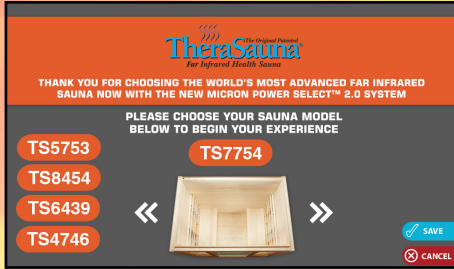

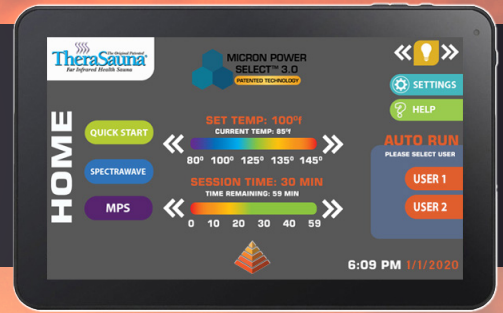

**MICRON POWER
SELECT™ 3.0**
PATENTED TECHNOLOGY

MicronPower Select™

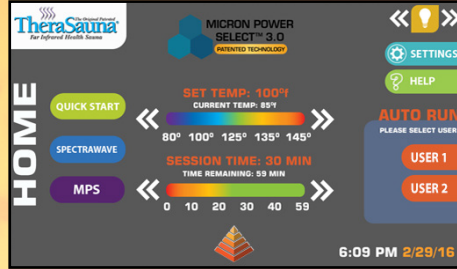

Allows you to control the power of each heating unit. Each TheraMitter™ can be turned to a power level of 1-15 so that each area of your body can be comfortable and other users can also be comfortable.
