5. Spotlight 40%	60 Lumen	8 Hours	✓

MODE 1, 2, 4, & 5: Press on button to adjust light mode

MODE 3: Press on button, release and hold for 3 seconds

How to Use The OptiGlow Headlamp

1. Adjust the headband to fit over your head, hat, or hardhat

---

2. Toggle to find the light mode best suited for the task at hand. The 230° wide-angle strip light is best used for activities including hiking, camping, and dog walking, whereas the spotlight is more suitable for precision tasks like car maintenance and house repairs

---

3. On the go? Activate the motion sensor feature by pressing the button next to the power button and wave your hand over the sensor to turn on and off with ease. When this mode is activated, the indicator light will shine red and green

---

4. Turn off the headlamp by pressing the off button

---

5. When the indicator light shines red, it is in need of charging

---

6. The indicator light will shine red when charging, and when charging is complete it will shine green

What's in The Box?
