1-Button Wallstation

QSWS2-1BN-WH
(Non-insert version)

QSWS2-1BI-WH
(Insert version)

Description

- Offers toggle functionality for any combination of zone(s) in the system.
- Receives up to two contact closure inputs via a connector on the back of the Wallstation.
- Contact closure feature:
 - Inputs 1 and 2 closure actions will initiate the button's programmed function.
- LED reflects door status of one partition.
- Large, rounded buttons are easy to use.
- Backlit buttons with optional engraving make it easy to find and operate the Wallstation in low light conditions.
- Optional button engraving is angled up to the eye for easy reading.
- Options for programming buttons after installation (choose one):
 - Button will toggle Scene 1 and Off.
 - Button will toggle a zone or a group of zones.

Finish and Engraving Options

- Standard model wallstations are white and come unengraved.
- Available with button engraving that can be customized for lighting and/or shade applications on any model.
- Three engraving options are available: General Engraving (EGN), Standard Engraving (E01), and Non-Standard Text Engraving (NST). For more details, please visit the *GRAFIK Eye QS* website at www.lutron.com/grafikeyeqs.

Description

- Often used in entryways to select Scene 1 and Off.
- Receives up to two contact closure inputs via a connector on the back of the Wallstation.
- Contact closure features:
 - When keypad is programmed as scene, panic, zone toggle or sequence, input 1 closure will perform the top button action, and input 2 closure will perform the bottom button action.
 - When keypad is programmed as a partition control, input 1 and input 2 closures will open the partition, and input 1 and input 2 openings will close the partition.
 - When keypad is programmed to fine-tune, input 1 controls raising (closure = start; opening = stop) and input 2 controls lowering (closure = start; opening = stop).
- Large, rounded buttons are easy to use.
- Backlit buttons with optional engraving make it easy to find and operate the Wallstation in low light conditions.
- Optional button engraving is angled up to the eye for easy reading.
- Options for programming buttons after installation (choose one):
 - Recalls preset light levels for two scenes (1 and Off; 9 and 10; or 13 and 14).
 - Each button will toggle a zone or a group of zones.
 - LEDs reflect door status of one partition.
 - Enables or disables Wallstations.
 - Starts or stops one sequence (Scenes 5 through 16 sequence).
 - Disables keypads and makes lights go to Scene 16.
 - Allows fine-tuning of a group of zones.
- Shade control features:
 - Used to control multiple groups of shades independently from a single-gang keypad (e.g., a window with a sheer shade and a blackout shade).
 - Can control Sivoia QS Window Treatments.
 - Pressing the Open (or Close) button once will cause the window treatments to move to their fully open (or closed) position. Tap any button (regardless of function) to stop a shade that is in motion.

Finish and Engraving Options

- Standard model wallstations are white and come unengraved.

Dual Wallstation with 3-Button and 2-Button with Raise/Lower

QSWS2-1RLDN-WH-E01
(Non-insert version)

QSWS2-1RLDI-WH-EGN
(Insert version)

Description

- Used to control one or more lighting or window treatment zones simultaneously.
- Often used to select three different groups of shades using Open, Close, and Raise/Lower.
 - Used to control multiple groups of shades independently from a single-gang keypad (e.g., a window with a sheer shade and a blackout shade).
- Can control *Sivoia* QS Window Treatments.
- Functions as two independently programmable controllers: a 3-button (top keypad group) and a 2-button (bottom keypad group). Can control two lighting zones, two shade zones, or one of each.
- Options for programming buttons of top three-button keypad group after installation (choose one):
 - Recalls preset light levels for scenes (1 through 3; 5 through 7; 9 through 11; or 13 through 15).
 - Each button will toggle a zone or a group of zones.
 - LEDs reflect door status of partitions.
- Options for programming buttons of bottom two-button keypad after installation (choose one):
 - Recalls preset light levels for two scenes (1 and Off; 9 and 10; or 13 and 14).
 - Each button will toggle a zone or a group of zones.
 - LEDs reflect door status of one partition.
 - Enables or disables Wallstations.
 - Starts or stops one sequence (Scenes 5 through 16 sequence).
 - Disables keypads and makes lights go to Scene 16.
 - Allows fine-tuning of a group of zones.
- Receives up to two contact closure inputs via a connector on the back of the Wallstation.
- Contact closure features:
 - When the top keypad group is programmed as scene, panic, zone toggle, or sequence, input 1 closure will perform the top button action, and input 2 closure will perform the bottom button action.
 - When the top keypad is programmed as a partition control, input 1 and input 2 closures will close the partition, and input 1 and input 2 openings will open the partition.
 - When the top keypad is programmed to fine-tune, input 1 controls raising (closure = start; opening = stop) and input 2 controls lowering (closure = start; opening = stop).
- Large, rounded buttons are easy to use.
- Backlit buttons with on-button engraving make it easy to find and operate the Wallstation in low light conditions.
- Optional button engraving is angled up to the eye for easy reading.
- Pressing the Open (or Close) button once will cause the window treatments to move to their fully open (or closed) position. Tap any button (regardless of function) to stop a shade that is in motion.
- The LEDs next to each button are used during programming and provide feedback when the buttons are pressed.

Finish and Engraving Options

- Standard model wallstations are white and come unengraved.
- Available with button engraving that can be customized for lighting and/or shade applications on any model.
- Three engraving options are available: General Engraving (EGN), Standard Engraving (E01), and Non-Standard Text Engraving (NST). For more details, please visit the [GRAFIK Eye QS](http://www.lutron.com/grafikyeqs) website at www.lutron.com/grafikyeqs.

Description

- Used to control one or more lighting or window treatment zones simultaneously.
 - Used to control multiple groups of shades independently from a single-gang keypad (e.g., a window with a sheer shade and a blackout shade).
- Can control *Sivoia* QS Window Treatments.
- Functions as two independently programmable 3-button controllers. Can control two lighting zones, two shade zones, or one of each.
- Options for programming buttons after installation (choose one for each of the keypads):
 - Recalls preset light levels for scenes (1 through 3; 5 through 7; 9 through 11; or 13 through 15).
 - Each button will toggle a zone or a group of zones.
 - LEDs reflect door status of partitions.
- Receives up to two contact closure inputs via a connector on the back of the Wallstation.
- Contact closure features:
 - When keypad is programmed as scene or zone toggle, input 1 closure will perform the top button action of the top keypad group, and input 2 closure will perform the bottom button action of the top keypad group.
 - When keypad is programmed as a partition control, input 1 controls the partition programmed to the top button of the top keypad group (closure = close partition; opening = open partition) and input 2 controls the partition programmed to the bottom button of the top keypad group (closure = close partition; opening = open partition).
- Large, rounded buttons are easy to use.
- Backlit buttons with on-button engraving make it easy to find and operate the Wallstation in low light conditions.
- Optional button engraving is angled up to the eye for easy reading.
- Pressing the Open (or Close) button once will cause the window treatments to move to their fully open (or closed) position. Tap any button (regardless of function) to stop a shade that is in motion.
- The LEDs next to each button are used during programming and provide feedback when the buttons are pressed.

Finish and Engraving Options

- Standard model wallstations are white and come unengraved.
- Available with button engraving that can be customized for lighting and/or shade applications on any model.
- Three engraving options are available: General Engraving (EGN), Standard Engraving (E01), and Non-Standard Text Engraving (NST). For more details, please visit the *GRAFIK Eye* QS website at www.lutron.com/grafikeyeqs.

Specifications

Power Input (Control Link Terminal 2)

Low-voltage type PELV (Class 2: USA). Operating voltage: 24 V_{AC}

Key Design Features

- Field-changeable button and faceplate assemblies allow easy customization.
- Meets IEC 801-2. Tested to withstand 15 kV electro-static discharge without damage or memory loss.
- Faceplate snaps on with no visible means of attachment.
- Available as an “insert” style control for multi-gang.
- Can be ganged to share a common faceplate with NovaT® and Vareo® Dimmers. To order new Wallplates for multi-ganging, specify “R3” openings in a NovaT* multi-gang FB (fins broken) Series model number.
- Use Faceplate Replacement Kits to change color, button configuration, or engraving.
- Faceplate Replacement Kits may also be used to convert between non-insert and insert configurations.

System Communications and Capacity

- Low-voltage type PELV (Class 2: USA) wiring connects Wallstations to other devices on the QS Link.
- A QS system can have up to 100 devices and 100 zones; SeeTouch QS counts as one device and no zones on the QS Link.

Terminals

Accept up to two #18 AWG (1.0 mm²) typical.

Environment

32-104 °F (0-40 °C). Relative humidity less than 90% non-condensing.

Mounting

Typical backbox dimensions: 3.74 in. (95 mm) high, 2.17 in. (55 mm) wide, 2.75 in. (70 mm) deep.

Faceplate Information

Multi-ganging

- Order Insert (I) style controls.
- To order Wallplates for multi-ganging, specify "R3" openings in a NovaT*® multi-gang FB (fins broken) Series model number.

Examples:

Wallplate for 2 *seeTouch* Wallstations,
Model # NT-R3-R3-FB-(color)

- Order Claro® Wallplates for multi-ganging Wallstations in Gloss Finishes.
- Order Satin Colors™ Wallplates for multi-ganging Wallstations in *Satin Colors*.

Note: New button inserts are not included with multi-ganging Wallplates.

Faceplate Replacement Kits

Use Faceplate Replacement Kits to change: colors, button configuration, engraving, between insert and non-insert versions. Each Kit includes an adapter, button assembly, and wallplate

Non-Insert Kit

Insert Kit

Wallstation Installation

Control Station Device (CSD) Link Wiring

- Use low-voltage PELV (Class 2: USA) wiring to connect Wallstations to the QS link.
- Make connections inside the wallbox or in a switch/junction box with a maximum wire length of 8 feet (2.5 m) from the link to the Wallstation.
- Two #18 AWG (1.0 mm²) conductors for common (terminal 1) and 24 V_{AC} (terminal 2). These will not fit in terminals. Connect as shown.
- One shielded, twisted pair #22 AWG (1.0 mm²) for data link (terminals 3 and 4).
- Connect Drain/Shield as shown. Do not connect to Ground (Earth) or Wallstation. Connect the bare drain wires and cut off the outside shield.

Note: Some Wallstations have a "D" terminal for Drain. The Drain/Shield wire may be connected to this terminal.

Wiring to Control Link

Note: Use appropriate wire connecting devices as specified by local codes.

Contact Closure Inputs

Specifications

- Inputs must be dry contact closure or ground-referenced solid-state outputs:
- Wallstation is miswire protected up to 36 V_{DC}.
- Outputs must stay in the closed or open states for at least 40 msec in order to be recognized by the Wallstation.

Contact Closure Input Wiring

- Use low-voltage PELV (Class 2: USA) wiring to connect the contact closure inputs to the Wallstation.
