

# UNIVERSAL GOLF CAR MOUNTS

## User Guide | Model: ACC-SEGCLV5

These Universal Golf Car Mounts allow for a secondary mounting position for all SoundExtreme Powersports Amplified Soundbars.

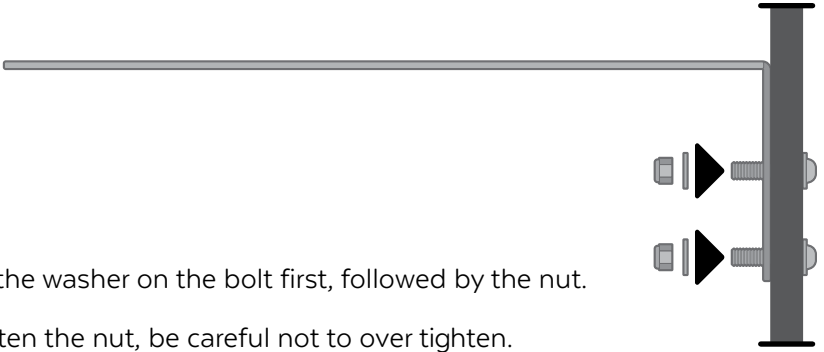

## Mounting Instructions

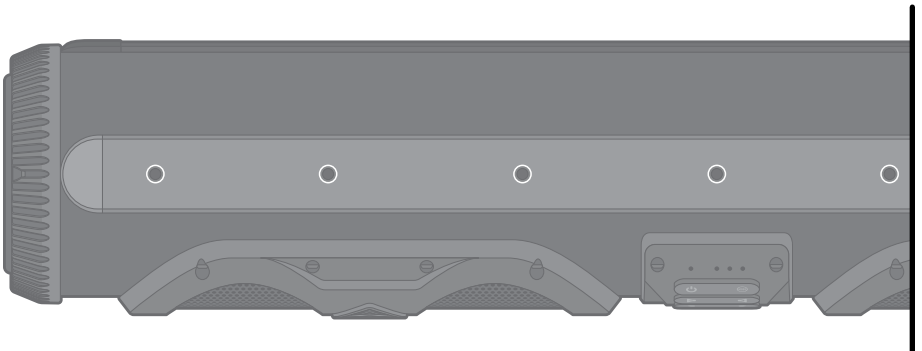

1. Use one of the Universal Golf Car Mounts to mark where to drill two holes into the desired mounting location on the upright strut.
2. When positioning the Universal Golf Car Mount, confirm that there is enough available clearance above the Mount to insert hardware to attach the soundbar to the Mount.
3. Drill the two holes.
4. Slide the washers and bolts into place while holding the Universal Golf Car Mount up to the bolts.

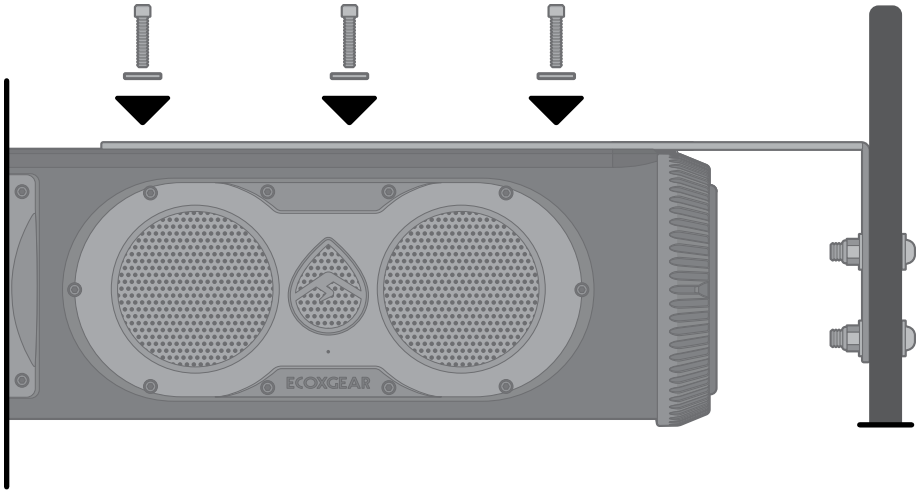

- Put the washer on the bolt first, followed by the nut.
- Tighten the nut, be careful not to over tighten.

- Repeat this process on the other side of the golf car, so you have one bracket on the driver's side of the golf car and one bracket on the passenger side of the golf car.
- Once the Universal Golf Car Mounts are properly secured, it is time to install the soundbar.
- Locate the  $\frac{1}{4}$ -20 integrated threaded holes on the top of the soundbar.

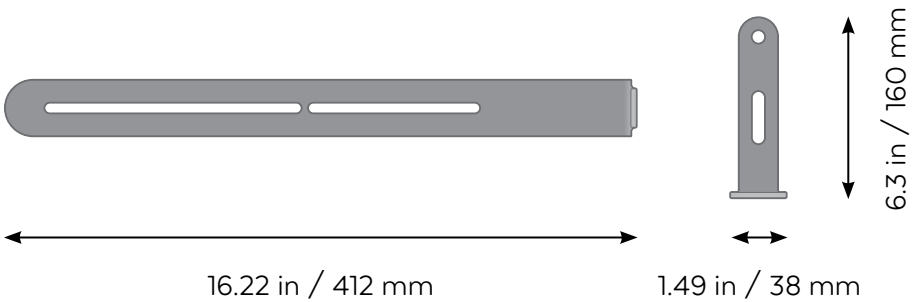

10. Line up the integrated threaded holes on the soundbar with the long slots on the Universal Golf Car Mounts and insert as many of the provided  $\frac{1}{4}$ -20 x  $\frac{3}{4}$ " bolts and washers as you can. Tighten securely.
11. Double-check to make sure the Universal Golf Car Mounts have been securely attached to the golf car, and that the soundbar has been securely attached to the Universal Golf Car Mounts.
