

How and Why to Install the Vibe Summit Perch

The Vibe Summit Seat is a new and exciting accessory by itself. It is almost infinitely adjustable to suit your personal preference or fishing style. It takes everything we love about the [Vibe Hero seat](#) and ELEVATES it, literally. The seat already sits up higher off the deck than ever before, but it has one more trick up its sleeve.

That is where the [Vibe Summit Perch](#) comes into play. This perch allows you to sit or stand 16" off the water. This will bring your sight fishing game to unprecedented heights.

Standing on the perch gives you the absolute best casting clearance for making those sidearm casts under cover. It allows you the full range of motion to make that perfect pitch or flip to entice that next bite. And if standing in a kayak is not your thing, sitting up on the elevated Summit Perch will give you that higher point of view that you can usually only get from standing up.

So, you are sold on the idea, but how do you install it?

Installation is easy! You can follow these easy steps and watch this video and you should be able to do it yourself in a matter of minutes.

The only tool required is a Philips head screwdriver

Instructions:

1. Take the Summit Seat out of the kayak and set it on a nice solid surface like a table.
2. Take the perch mounts and place them loosely on all 4 corners on the back of the seat.
3. Install the hardware loosely in the mounts as you will need to make adjustments later.
4. Line up the 4 posts on the perch with the posts, moving the posts as needed so the perch fits snugly over all of them.
5. Once the perch is in place, make sure that the posts are seated fully onto the perch.
6. Tighten all hardware.

And that is all there is to it! With the Vibe Summit Seat and the Summit Perch you now have an unprecedented advantage. Taking your sight fishing game to new heights.

No Drama. Just Adventure.
