

BLACKENED 11Z01

a fruity chypre for men

 Compound Black®	25 grams
 Deluxe Perfumer's Alcohol	60 grams
Total	85 grams

Combine and rest for four weeks then chill overnight before filtering. This makes enough to fill a 100ml* perfume bottle (or two 50ml bottles) with a little left over for testers. To increase the total number of bottles, simply multiply the formula by the total number you wish to fill.

This is the original extrait strength of 30%. For IFRA compliance dilute further to 20%.

* 85 grams of liquid perfume is usually enough to fill an average sized 100ml perfume bottle by volume. A little perfumer's alcohol can be added if a top up is needed depending on bottle size.

IFRA 51 Edition Ingredients
