## OUR HISTORY

From coal mining tools that helped fuel the industrial revolution to railroad and other tools used to rebuild the US transportation infrastructure, to our famous entrenching mattock used extensively in World War I and II for digging fox holes and trenches, Warwood Tools have been trusted by generations of hard-working Americans. In fact, American soldiers have relied on Warwood Tools in every war since the Civil War.

In 1854, immigrant Henry Warwood moved to Martins Ferry, Ohio after spending years in the Pittsburgh steel mills to found the Warwood Tool Company. He built his namesake as a coal mine and gardening tool supply company, but as the landscape of America changed, the company adapted to additionally provide tools for railway maintenance, construction, and oil and gas industries. Warwood Tool moved to Wheeling, West Virginia in the early 1900's where they were initially surrounded by bucolic farmland, as a town quickly sprang up around the manufacturing facility along the banks of the Ohio River, it was named Warwood in honor of the forging company.

**The town of Warwood still thrives to this day.**

## OUR MISSION

We eat, sleep, live, and breathe "Made in America." We are hard people that make hard products. By hand, we forge, bend, grind and handle US steel to make the finest industrial grade hand tools in the world. We depend on each other here; for growth, for humor, for safety. For all the sledge swingers who believe in doing it right the first time, for all the construction workers who rely on quality over quantity. We still make it like they used to make it, because it's the best way to make it.

**We are Warwood Tool, and we earn it every day.**

## PROTECT YOUR EYES; WEAR SAFETY GOGGLES

OSHA Regulations 29 CFR 1910.133 requires the use of eye protection not only to workers using striking tools, but to nearby workers in the immediate work area. Similar requirements are contained in OSHA Construction Standards 29 CFR 1926.102. Mine Safety and Health Administration requires eye protection in the Mining environment 30 CFR 55.14-4, 30 CFR 56-15-4, 30 CFR 57-15-4, 30 CFR 75.1720(a) and 30 CFR 77.1710(a).

**DO NOT EVER STRIKE THE HEEL OF A CLAW BAR WITH ANOTHER TOOL!**

**USE ONLY TO REMOVE SPIKE AFTER USING A SPIKE LIFTER FIRST TO FREE IT UP!**
