

Micro Cart™

User's Guide

To take full advantage of the ergonomic features of your new Sun Mountain Micro Cart, please read the following information.

Umbrella holder mount

Console tray includes a padded valuables tray and magnetic score card holder

Adjustable handle

Lightweight aluminum frame

Four wheel design requires no tracking adjustment

Low center of gravity provides superior stability

Your Micro Cart has several innovative features designed for convenience, easy access and use.

- Parking brake.

- Integrated tee and pencil holder.

- Padded valuables tray with magnetic lid.

- Solid foam tires.

- Folds down in seconds to fit in your trunk.

Folded dimensions: 24"X16"X12.5"

INSTRUCTIONS FOR UNFOLDING YOUR MICRO CART

STEP ONE: UNFOLDING THE UPRIGHT TUBES

Release the folding latch underneath the accessory tray by lifting up on the rim of the cup holder. While holding the front wheel in place with your hand or foot, pull the handle back until the upright tubes are fully extended. Secure the cart by engaging the yellow latch hook and lever as shown in the illustration on page 4. If your lever is too tight, loosen the nut at the base of the latch hook,

turn the latch hook until the lever is comfortable to maneuver, and retighten the nut.

STEP TWO: SECURING THE HANDLE

Lift the handle, until the handle height is comfortable. Move the yellow handle latch forward toward the upper bag rest to secure the handle. Over time, the handle tension may decrease causing the handle to ratchet. To increase the tension, simply turn the twist knob clockwise in small increments until the handle is secure. It is easiest to make this adjustment when the cart is folded.

STEP THREE: ADJUSTING THE HANDLE HEIGHT

To reset the handle height, release the handle by pulling the handle latch toward the accessory tray. Lift or lower the handle to the new height and secure the handle latch.

STEP FOUR: LOADING YOUR GOLF BAG

Unfold the triangular lower bag support and place the bottom of your golf bag on it. Then lean the top part of your bag into the upper bag support. The bag bracket secures your bag without straps. The width of the upper bag support can be adjusted by turning the thumb screws on both sides. If your bag pockets are touching the front wheels, you may expand the front axle. See page 13 for instructions.

STEP FIVE: STEERING

To steer you cart, push down on the handle so the front wheels lift slightly off the ground. Then pivot right or left to change direction, lower the front wheels and go.

ACCESSORIES TRAY ASSEMBLY

17	MC1-229	Lower Delta Link	1
18	MC2-346	Pouch Clip	2

Adjusting the Brake:

The brake cable lengthens over time and as a result, the brake pin hits the disc brake. To tighten the brake cable, turn the brake cable adjustment stud clockwise (item 7) until the brake pin has enough clearance.

Item #	Part #	Description	Qty

12	MC1-274	M4x5mm Phillips Pan Head Screw	1
13	MC1-275	Brake Cable Stud	1

Extendable Front Axles

If your bag pockets are touching the front wheels, the front axle can be extended to accommodate the larger bag. To extend the front axles, unscrew the four hex screws (A,B,C) using the allen wrench we provided, and pull the wheels outward. There are four holes on each axle; choose the width that works best for your bag and refasten the hex screws.

Adjusting the Alignment:

All Micro-Carts go through alignment testing before they are shipped. However, if your cart is not rolling straight you can adjust the alignment with the internal hex bolt (B & C). If your cart goes right turn the left bolt (B) clockwise and the right bolt (C) counter-clockwise. Conversely, if your cart goes left, turn the left bolt (B) counter-clockwise and the right bolt (C) clockwise.

Brake Lock Out

If the brake cable fails, you will need to disengage the brake pin. To do so, flip the cart upside down and pull screw (A) back and into the locked position as shown.

Maintenance:

Fertilizers and other chemicals used on golf courses can be corrosive over time. To keep the powder-coated finish of your Speed Cart in good condition, wash your cart regularly with a damp wash cloth and mild detergent.

Limited Warranty:

Sun Mountain warrants the Micro Cart to be free of defects in materials and workmanship. The cart frame (two parallel tubes from the handle to the wheel) is warranted for 3 years from date of purchase. Other parts such as the tires, brakes, handle wrap, etc. are warranted for 1 year from date of purchase. This warranty does not cover normal wear and tear, damage, failure or loss resulting from misuse, accident, neglect or failure to follow instructions or warnings in this user's guide.

IMPORTANT!

Pulling the Speed Cart V1 behind a power cart or using it as part of a rental fleet voids the warranty. Sun Mountain is the sole judge of any claim or warranty. Proof of purchase is required.

Warranty Registration:

Please register your item by visiting our Customer Care section at www.sunmountain.com

Claim Procedure:

If you have a claim covered by the warranty, please call our customer service staff to identify and resolve the problem.

If it is deemed necessary to return your cart, a return authorization number will be provided by the customer service agent. This number **MUST** be included on the product or package being returned.

For claim information, please call 1-800-227-9224.

For customer service or replacement parts
call 1-800-227-9224.
