

Hard-Wearing and Customised Protection for Power Tool Batteries

BattShell is a new, custom-designed accessory for tradies looking to protect and personalise their power tool batteries.

Made by high-pressure injection moulding from high-density polycarbonate, the industrial strength product is both durable and hard-wearing

Designed to fit snugly around most standard battery sizes, including popular brands such as Makita and Milwaukee, BattShell incorporates strategically located venting to disperse heat safely and effectively, keeping users and batteries safe from damage.

This Australian-made product is offered in over 20 x brightly coloured options to help tradies distinguish their batteries from others on a busy building site. It also comes with a twin set of complementary sticker designs, creating 400 different combinations of BattShell to select from.

BattShell gives tradies peace of mind knowing that their batteries are protected and easy to identify.

It is a high-quality and reliable accessory for tradies who are looking to stay organised and efficient on the job site.

BattShell can accommodate corporate branding for bulk purchases and is perfect for promotional branding on a construction site.

CORE FEATURES

Tough
