YewdaleDefiant® medway fabric

The YewdaleDefiant® Medway fabric has a high-quality look and feel wherever it is located. The unique cloth-fronted polyester weave with a PVC coating on the reverse ensures total light exclusion whilst maintaining a high class, soft cloth weave appearance. Presenting a nine-colour combination along with one of the most advanced production procedures, this flame retardant fabric is designed with commercial, education and healthcare environments in mind. This industry leading 2200mm wide fabric ensures that joins are kept to a minimum to assist in wastage, design and speed of fabrication. This fabric contains Biosafe® which is the international accreditation standard of our proven antimicrobial formula that has been tested under the most stringent measures to ensure effective inhibition of infection.

shading efficiency

Transmittance is the amount of light and heat transmitted beyond the fabric. The lower the amount, the greater the efficiency.

Block/reflect is the amount of heat and light that is blocked or reflected. The higher the amount, the greater the efficiency.

Absorption is the amount of heat and light absorbed in the fabric. The higher the amount, the lower the efficiency.

Ultraviolet protection illustrates how protective the fabric is against ultraviolet rays. The higher the amount, the greater the effectiveness.
