TEMPORARY PARTITIONING SYSTEM

TEMPORARY PARTITIONING SYSTEM

Rapid, hygienic, temporary screening and partitioning. A flexible and versatile screening solution that can be rapidly deployed and easily reconfigured.

OVERVIEW

- Powder coated aluminium frame
- Removable fabric panel secured within frame
- Easy self-assembly with no tools
- Free-standing or fixed, mobile and folding frames
- Bespoke sizes and finishes available

SYSTEM DETAILS

Using fabric-retaining technology from our popular KuroLok blind system, ScreenLok is a fixed fabric screen with a multitude of uses.

Choose from a wide range of fabrics and colours. From wipe-clean anti-microbial vinyl to decorative fabrics; from solid opaque material to a range of translucent and transparent options.

Extruded aluminium frames are powder-coated white (RAL 9016) as standard, with any other RAL colour available to order. ScreenLok can be easily assembled by two people in less than 60 seconds. Each screen comes with feet which allow multiple screens to be configured into an endless variety of shapes and layouts, and can be simply reconfigured as and when required.

The fabric panels are removable and replaceable, and the screens can be erected and dismantled multiple times.

USES & APPLICATIONS

ScreenLok is a hugely versatile temporary screening and partitioning solution. It has many applications in healthcare, events management, public safety and more. The screens are hygienic and easy to clean, making them perfect for patient privacy and prevention of cross-infection in healthcare environments. Contaminated fabric panels can be removed for cleaning or replaced completely.

ScreenLok is perfect for temporary installations and occupies very little storage space in between uses. No special skills are required to assemble or dismantle, making this a solution for every situation.

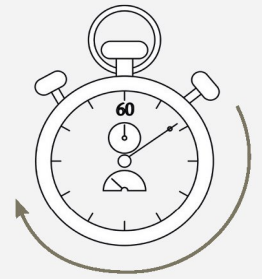

Screens can be manufactured to bespoke sizes to fit your particular requirements. Just tell us what you need and we'll be happy to design a made-to-measure solution.

SIMPLE & EFFECTIVE

&SCREENLOK
FEATURES

Assemble in less
than 60 seconds!

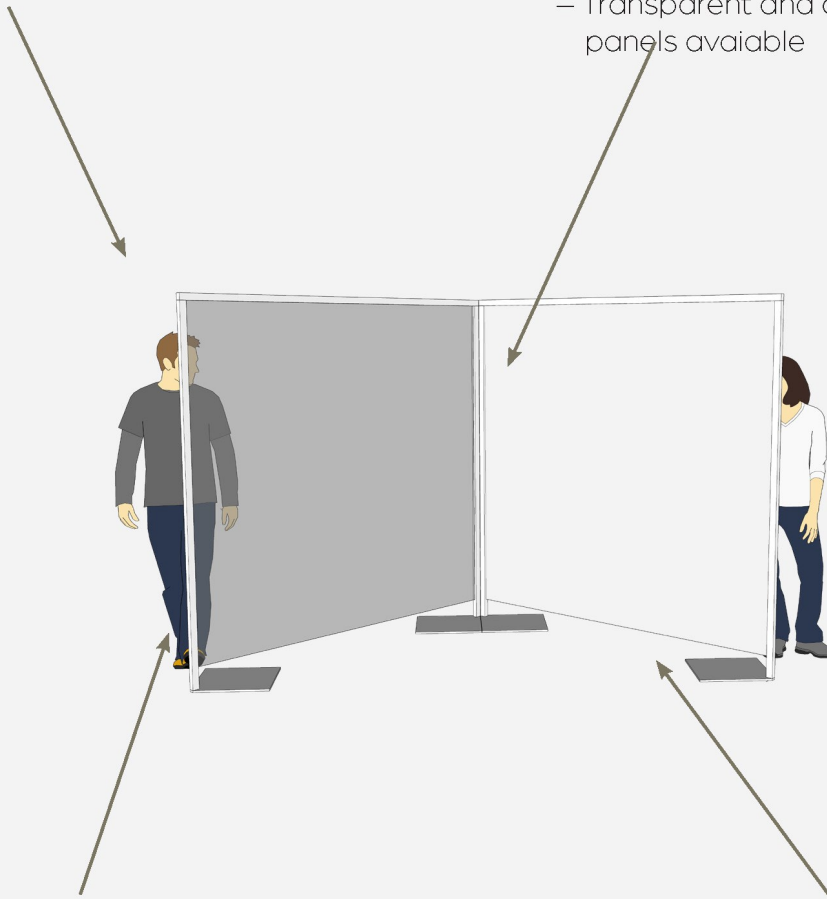

BESPOKE SIZES

- 2m x 2m as standard
- Bespoke sizing available on request

PVC FABRIC PANEL

- Anti-microbial fabric panel
