Welcome to Resin Rock

Your trusted partner in the world of resin bound surfaces! We are a dynamic and innovative resin bound distribution company, dedicated to transforming landscapes and surfaces across the United States. With a commitment to excellence and sustainability, we're here to redefine your outdoor spaces and enhance their aesthetic appeal. At Resin Rock LLC, our vision is simple yet powerful, to revolutionize the way Americans perceive and experience outdoor surfaces.

Why Choose Resin Rock?

- 1. Exceptional Products:** Our carefully curated selection of resin-bound materials ensures that you have access to the best products available on the market, guaranteeing long-lasting and stunning results.
- 2. Expert Support:** We don't just provide materials; we provide expertise. Our team of seasoned professionals is here to assist you every step of the way, from project planning to execution.
- 3. Sustainability:** We care about the environment and take steps to reduce our impact. Our sustainable practices align with our commitment to a greener future.
- 4. Nationwide Distribution:** With a widespread distribution network, we can efficiently serve customers all across the USA. No matter where your project is located, we've got you covered.
- 5. Custom Solutions:** Every project is unique, and we offer tailored solutions to meet your specific needs and design preferences.

Welcome to Resin Rock!

Tony has been in the construction industry for 17+ years and has always brought an enthusiasm and dedication to everything he does. An extremely driven individual with an expert eye for detail. Tony believes that Resin Bound can be the future of outdoor and indoor surfaces across America! Teaming up with Lucas 'Lagoons' Congdon to bring you this exciting new opportunity. We will be offering training as well as supplying the best products and creating beautiful landscapes along the way! Thank you.

Tony Dyke
Director

Lucas has been cutting and crafting stone since the age of 14 where his creative talents and love for outdoor design quickly surfaced. Moving to Florida in 1999, he was delighted to find the variety of plants and trees available, not to mention the very interesting limestone rocks. He started Lucas Lagoons in 2003 where his first project was a dramatic natural sand bottom lagoon using native limestone boulders. The project won Lucas Lagoons the prestigious Gold Award in residential pool restorations. Lucas is also the star of his hit show "Insane Pools: Off the Deep End."

Lucas Congdon
Director

Resin Bound

Resin Bound is a surfacing solution that results from mixing resin and aggregates together in a forced action mixer. This creates a mixture that can be trowelled onto a surface to provide a smooth, flat finish.

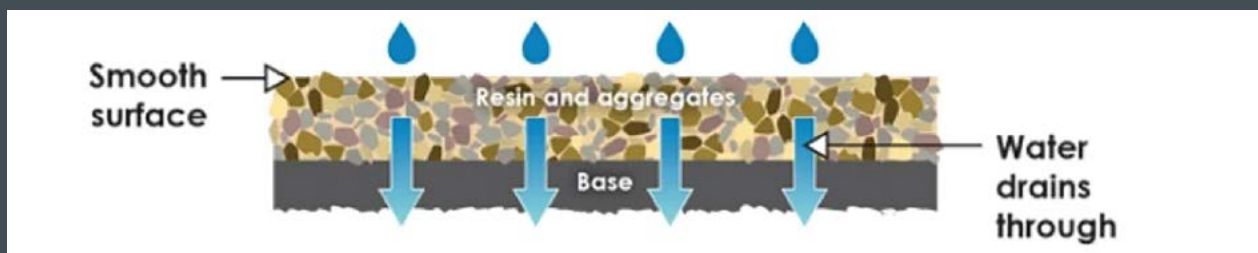

A Resin Bound system is also known as 'stone carpet'. Its seamless finish provides a decorative bound gravel surface that is attractive, durable, and practical.

Due to the way it is mixed, allowing for small gaps between aggregates, a Resin Bound system is permeable. This means it is also a SUDS compliant solution which means planning permission isn't required as long as a suitable porous subbase is used. The Resin Bound system can be overlaid to existing or new concrete or tarmac to create beautiful resin driveways, pathways, car parks or any light traffic surfaces.

NO MORE PUDDLES!

Resin Bound is a permeable paving solution that is SUDS compliant

A Resin Bound system is a permeable paving solution. This means it allows water to pass directly through it into the ground beneath. This is handy for a number of reasons.

- Firstly, Resin Bound is a Sustainable Urban Drainage System (SUDS) compliant surface solution, providing it is laid on an appropriate permeable sub-base.
- A permeable resin driveway will help prevent standing water on the surface. This means fewer puddles and fewer wet shoes.
- Allowing water to pass through into the ground beneath also helps to reduce flood risk in both urban and rural areas.

SUITABLE FOR FOOT & VEHICLE TRAFFIC

100% PERMEABLE

GENUINE MARBLE & QUARTZ ROCKS

Why choose a Resin Bound system?

Resin Bound systems bring several benefits compared with other surfacing systems, including permeability, improved slip resistance, seamless finishes and more. Learn more about the benefits of Resin Bound gravel.

Resin Bound Training Courses

The only Resin Bound training course you need.

Do you want to earn up to 300% more revenue?

The training course is designed for people of all experience levels, from DIY users to skilled tradesman. Our Resin Rock training courses are a 1 day hands on, action packed course. You will learn the in-depth theory behind our systems.

There are two levels to our courses which you can complete, intermediate and advanced. Our resin bound fundamentals courses are a hands-on, reality based, action packed course where you learn the key fundamental principles and most common pitfalls of installing resin bound surfacing. Once you have completed our intermediate course you can then go on to further your skills with the advanced course.

Lunch & Refreshments Provided

Exclusive Resin Rock Merchandise

Certificate of Competence

Intermediate (theory and practical) **\$750**

- Explain the uses & pro's of Resin Bound
- Applications of Resin Bound
- Seminars covering quoting customers, marketing, and much more.
- Tools needed and why & explain each persons role
- Sub base applications, variations, beads & primers
- How to measure area required for materials including wastage allowance
- Practical session

Advanced (practical) **\$1200**

- How to install steps and risers
- How to install borders on perimeters
- How to install logos/designs into resin

Save **10% off** when you book both courses together

What's included:

- An introduction to Resin Bound
- The benefits of Resin Bound vs other surfaces
- Suitable sub-bases for Resin Bound to be laid
- Laying Trade Kits

BARON®

Baron is one of our trusted partners.

A forced action mixer from Baron can be used for the majority of the demanding mixing jobs for the professional craftsman.

All mixers are designed and the components are carefully selected to give you the best efficiency, safety, and durability.

We supply a range of BARON mixers and conveyors, for more details go to resinrockllc.com under the products tab

LUCAS LAGOONS

A legacy of artistry

A big hello and welcome from Lucas and the crew! By now you have probably seen at least one episode of our hit build show, Insane Pools: Off the Deep End. If you haven't yet, then you should check it out!

We will be working closely with Tony at Resin Rock on some exciting future projects with Resin Bound.

"Finally a permeable hardscape solution that is beautiful and seamless unlike permeable pavers!"
