NORTON RIDGE

CROSBY

Crosby & Norton Ridge are two labels that were born out of the need to have well-made, yet affordable California wines that embody varietal and vintage characteristics. At £16.00 RRP, you can't deny their suitability for the UK market.

The wines are produced using quality declassified grapes, which would otherwise be used for wines that command a considerably higher price point. Ultimately that means the grapes are diligently sourced using the highest standards.

The wines are made in collaboration with seasoned grape growers and winemakers, who are deeply familiar with the vineyards and terroir. Focusing on California's signature varietals, Crosby and Norton Ridge both produce exemplary Chardonnay and Cabernet Sauvignon of remarkable value.
