

DFI Coatings Post-Care Instructions

For Glass Surfaces

Shower Glass Enclosures

For best results, rinse the shower glass after each use and wipe down any remaining droplets. You may also towel dry the surface or use a squeegee. Once a month, wet the shower glass and use a nylon body puff to go over the surface until clean and smooth. Then rinse and dry the glass.

Glass Railings/Windows

Glass railings and windows can be cleaned with any liquid dish soap and water, along with a non-abrasive sponge or microfiber towel and a squeegee. Please note, in situations where surfaces are continually exposed to hard water, sprinklers, pool cleaners, and other forms of artificially-made water contact, a simple maintenance routine is recommended to keep deposits from developing on the coating over time.

Other Recommended Cleaning Products:

Ammonia-Free Windex®
Sparkle® Ammonia-Free Glass Cleaner
Sprayway® Ammonia-Free Glass Cleaner
White household vinegar diluted with water
Seventh Generation™ Natural Glass & Surface Cleaner
