

Restoration Powder™

Application Instructions

Application Instructions

- 1 Start by wetting the surface as needed and apply Restoration Powder™ with a non-abrasive nylon pad, using circular motions. If you do not have a non-abrasive nylon pad, we recommend using our white scrubber pad with handle. If stains persist, use more pressure.
- 2 Thoroughly rinse any residue and dry glass after for optimum performance.

Important:

It is recommended to test a small amount of Restoration Powder™ on an inconspicuous area before use to ensure compatibility. Not for use on lacquered surfaces.
