About Us

04

At Opal, we are passionate about the fusion of science and beauty. We go beyond the traditional production model to offer a one-stop integrated service of research and development, production and brand image creation. We work closely with a global network of partner manufacturers, giving our customers the flexibility to choose the location of production to perfectly realize their vision.

Our Commitment to Products

Our commitment to quality is unwavering, ensuring that our clients are always aligned with the world's best practices and latest technologies. This integration keeps them at the forefront of the ever-evolving beauty industry, maintaining a competitive edge.

We meticulously craft our products with a dedication to dermatological testing for safety, vegan principles, CFI-certification, and sensitivity to skin. We are staunchly against animal testing and ensure that our products are cruelty-free, guaranteeing that they uphold the highest benchmarks of safety, ethics, and inclusivity for consumers globally.

Skin Care Capabilities

07

Sebum Control

Help balance sebum production.

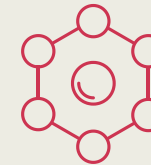

Salicylic Acid

Acne Care

Helps control and treat acne for smoother skin.

Salicylic Acid

Antioxidant

Combat oxidative stress and protect the skin from environmental stressors.

Vitamin C, Vitamin E

Hydration

Replenishing the skin with moisture.

Vitamin B3, Vitamin B5, AHAs

Soothing

Calming and comforting the skin.

Ceramides

Prevent Water Loss

Maintaining the skin's health and barrier function.

Hyaluronic Acid

Anti Aging

Slow down the visible signs of aging.

**AHAs, Collagen, Ceramides,
Hyaluronic Acid, Retinol**

Moisturize

Increase the skin's water content.

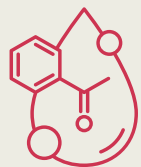

**Collagen, Ceramides,
Hyaluronic Acid**

Collagen Boosting

Increasing the skin's collagen production or supporting its structural integrity.

Vitamin C

Niacinamide

Protects the skin from free radicals and environmental damage.

Vitamin B3

Liquid Exfoliates

Promotes skin renewal and improves skin texture.

AHAs, BHA, Salicylic Acid

Cell Rejuvenates

Activates and renews skin cells.

Vitamin B3

Whitening

Lightening the skin tone.

Vitamin B3

Brightening

Enhances skin's radiance and evenness of skin tone.

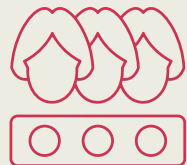

Vitamin C, Hyaluronic Acid

Radiance

Maintains skin's natural radiance and vitality.

Vitamin B3, Vitamin B5

Improve Skin Tone

Help achieve a more even, radiant, and healthy-looking complexion.

AHAs

Unclog Pores

Removes impurities from skin pores

BHA

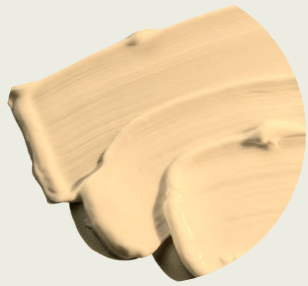

Anti-bacterial

Combat acne-causing bacteria, reduce inflammation

Salicylic Acid

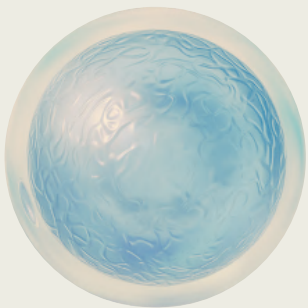

Skin Care Technology

Moisture Mesh Technology

A specific type of skincare technology designed to lock in moisture and keep the skin hydrated.

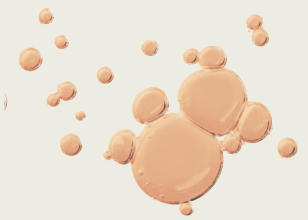

Water Free Formula

Provide moisturization without the use of water, promoting sustainability and convenience.

Microcrystalline Technology

Use of microcrystalline cellulose (MCC) as an ingredient for its texturing, stabilizing, and film-forming properties in cosmetic formulations.

Actives Capsules

Protect and control the release of active ingredients for enhanced efficacy and stability.

Natural ingredients for the ultimate sensory experience.

Aroma Space Technology

Extracting certain properties of natural flavours in a harmless manner.

Packaging

About Packaging

31

Eco-Friendly Commitment

We're dedicated to sustainability, crafting packaging that's as beautiful as it is responsible. By integrating recycled materials and eco-conscious practices, we create solutions that reflect our commitment to the environment. Our goal is to provide packaging that not only captivates but also respects the world we live in.

- SAFE FOR PEOPLE AND PLANET
- LOW CARBON FOOTPRINT
- SUSTAINABLY SOURCED
- NO PERMANENT MICROPLASTICS

Packaging Design & Research

Our design and packaging research services offer insights into consumer preferences and market trends, helping clients create packaging solutions that captivate and engage consumers.

- OUTSTANDING USABILITY
- MASS-PRODUCIBLE
- PREMIUM QUALITY

Packaging Design

33

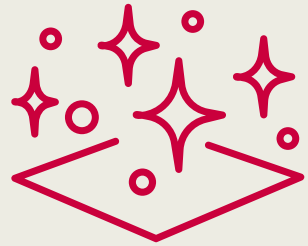

At Opal, our design team—led by a renowned Hong Kong designer and comprising over 20 skilled professionals—is a powerhouse of creativity and expertise. With 42 design patents to our name, we've demonstrated our commitment to innovation and originality. Through global collaborations, we've honed our craft to deliver market-savvy and visually stunning designs.

Our comprehensive services include conceptualization, hand-drawn illustrations, packaging design, 3D modeling, 3D printing, and more, all executed at a professional level. This ensures that every aspect of your packaging tells a compelling brand story and stands out in the marketplace.

- Special Choice

Materials

36

We carefully select the most appropriate packaging materials for each of our formulations, balancing a range of considerations to ensure optimal product housing and to offer more eco-friendly choices for our clients.

Plastic

Bottles, jars, and accessories are available in various types of plastic, including recycled options. Our selection includes HDPE, HDPE Soft Touch, LDPE, PET, PETG, PP, PVC, recycled HDPE, recycled PET, recycled PP, and more.

Bioplastics

Made from renewable sources, are an environmentally friendly alternative to traditional plastics. We offer PLA, PBS, PCL, PHA, PBAT, and other eco-friendly materials.

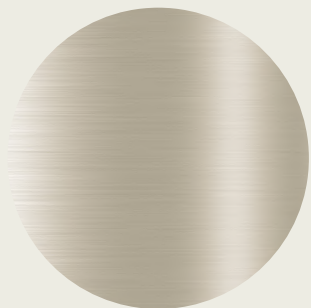

Wood

Is a natural, eco-friendly packaging material that exudes a sense of luxury and warmth. It is derived from sustainable forestry practices, ensuring that the material is responsibly sourced.

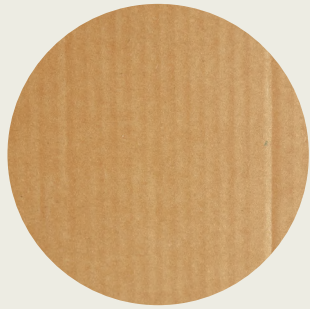

Glass/ Colored Glass

Embodies elegance, durability, and chemical stability in cosmetic packaging. It is also an eco-conscious choice, aligning with sustainability values.

Aluminum

Is versatile, environmentally friendly, and lightweight. It is also an easy-to-control dispensing material and can be infinitely recycled at any time.

Cardboard/Paper

Is the most common choice of outer packaging, and we select options that are recyclable and certified by either the FSC® or the PEFC.

Ceramics

Is a durable and elegant material, providing a sophisticated touch to cosmetic products with its customizable and glossy finish.

Special Choice

Except for standardized materials, we also provide materials that resonate with your brand's aesthetics, sustainability goals, and functional needs, ensuring a unique and authentic product presentation.
