IONIC
RESCUE

Rescue PRO Buoyancy Aid

IONIC®

The Rescue PRO was developed as a technical rescue PFD for the Emergency Services to be used for all water borne operations. Manufactured using hard wearing durable ripstop fabric it comes loaded with features and is certified to the latest ISO 12402 (2020) standard.

The Rescue PRO has one of the highest buoyancy levels compared with other brands on the market which means the rescuer will sit higher in the water during use. It is also fitted with twin removable crotch straps for added safety.

The Rescue PRO has the facility to retro fit reflective ID badges ensuring maximum visibility and corporate identity.
