- ↳ A safety feature that prevents damage to the controllers

Charging Indicator

- ↳ Battery charging LED indicator to check charge status

Easy & Secure Fit

- ↳ Easily glide and fit controllers into the charging dock

Stable Rubber Base

- ↳ Rubber grip base design to keep the controllers in place

Power

Input	: 5.2V/2A
Single Output	: 5V/400mAh

Charging

1. First connect the charger to the type-C charging cable through the DC 5V power supply or consoles USB port. After the power is powered on, the LED at inside will bright.
2. After powering on the Space Dock 2.0, slide the Joy-Con into the charger rail slot in turn. Now the charging indicator at the inside will turn red, indicating that the Space Dock is charging the Joy-Con. When fully charged, the charging indicator will turn red to green.
3. When power on, default setting of space dock 2.0 is looping RGB. Press the light button on the Front of space dock 2.0 to choose the light mode: Loop, One color, Lights-Off.

*If no charging is detected, Joy-Con short circuit or open circuit is detected, all the charging indicator inside will light green. After the circuit protection, all output power will be automatically turned off, and it can be restored to normal only when it is powered on again.
