

EIGHT AUDIO

We have been fans of this start-up ever since they debuted at the What Hi-Fi Show in Mumbai last year. Their speakers subsequently garnered a rousing review in the mag and now they are ready with their latest offering - the Agate series. Set-up in a 5.1.2 Dolby Atmos configuration, the system sounded way more expensive than its sub ₹3 lac price tag would suggest. The trademark Eight Audio sound was intact with mellow highs and a deep, controlled LF response. BenQ and Screen Innovation provided the visual thrills alongside the cinematic sound from the Agate.
