Range OMEGAVIE® 3624 is produced from crude oils selected to give the highest available content of EPA and DHA. The crude oils are mainly originated from fish families such as sardine, anchovy and mackerel.

The fish being used to produce this fish oil range are being caught in the open sea in Peru, Chile and/or Morocco mainly but not exclusively.

The final product is produced in France in our Production unit in La Foret Fouesnant (29).
