

# Pressure References with Gauge Design

For mobile and stationary calibration applications, pressure ranges

-200 / +200 mbar to 0 – 1000 bar, accuracy  $\leq \pm 0.05\%$  or  $\leq \pm 0.02\%$

**DPG 2600 A**

**DPG 2600 A+**

## Application

The digital pressure gauge DPG 2600 has been developed for the calibration of pressure transmitters, pressure gauges and pressure switches.

The DPG 2600 is available in two versions:

- all-rounder DPG 2600 A  
with a measurement uncertainty of  $\leq \pm 0.05\%$  FS
- all-rounder+ DPG 2600 A+  
with a measurement uncertainty of  $\leq \pm 0.02\%$  FS

The digital pressure gauge DPG 2600 is based on the latest microprocessor technology and is one of the most advanced portable digital precision pressure gauges in terms of accuracy and functionality. The polynomial based temperature and pressure compensation ensures highest accuracy in every situation, even in harsh environments.

## Construction

- Pressure ranges from -200 / +200 mbar up to 0 – 1000 bar
- Optional barometric reference (required for the change of absolute pressure  $\Leftrightarrow$  gauge pressure)
- DPG 2600 A with  $\leq \pm 0.05\%$  FS for general calibration applications
- DPG 2600 A+ with  $\leq \pm 0.02\%$  FS can also be used for the control of inspection, measuring and test equipment
- Fully temperature-compensated from -10 °C to +50 °C (14 °F to 122 °F)
- Large LC display with many additional indications
- RS-232 connection
- Supply either via 4 NiMH batteries or via the included mains adapter; the batteries are charged during mains operation
