

# AVAILABLE IN 7X7, 4X7, 4X7 Z-SCREEN AND 9 SQUARE PITCHING TARGET THE LAST SCREENS YOU'LL EVER BUY!

We've owned and used many protective screens. Frustrated with the throw-away build quality and fragility of other screens, we set out to make a heavy-hitter, **Safer and More Durable**, protective screen that takes repeated punishment from baseballs or softballs.

**Our Webflex Patented Technology\*** allows the protective screen to **FLEX** when struck by a baseball or softball. Other screens just won't hold up to repeated hits without failure. Our screens absorb the energy of the ball when the frame takes a direct hit, bending, but never breaking. This is accomplished by allowing the frame to float on our proprietary rubber elastomers.

## **Our Number One Goal Is Safety!**

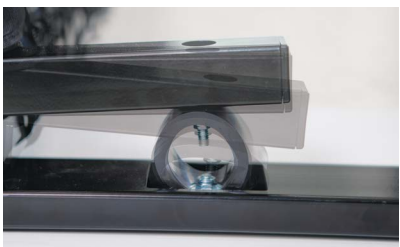

Yes, Web Flex Screens are nearly immune to damage by the ball, but these screens were designed to protect **BOTH** the hitter and the pitcher, and built to last.

**WE GUARANTEE IT OR YOUR MONEY BACK!**

## **FEATURES INCLUDE:**

### **Patented WEBFLEX technology**

- Safety! Protects Both Hitter And Pitcher
- Prevents Frame Damage
- Greatly Reduces Surface Damage To The Ball
- Reduces Movement Or Sliding Of The Screen When Struck By A Ball
