

DERMACLARA

OCCLUSION PATCH™

BOOTY FACIAL PROTOCOL

YOU WILL NEED ONE PACK OF 7" BODY PATCHES FOR THIS TREATMENT.

THIS TREATMENT IS FOCUSED ON BRIGHTENING AND REDUCING VISIBLE SCARS AND HYPERPIGMENTATION.

45 TO 60 MINUTES

Cleansing And Prep - 10 Minutes

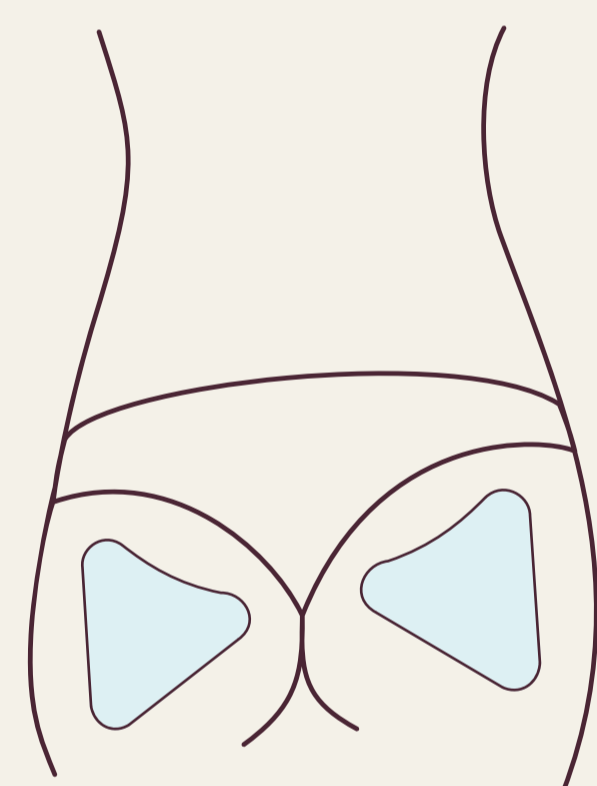

I With the client laying face down, cleanse the buttocks and remove any natural oils and impurities. Repeat this cleansing process again. Use a warm towel to remove any remaining cleanser. Swipe an appropriate toner for the clients skin condition across the buttocks, then pat dry with a tissue.

Steam, Enzyme & Extract Treatment - 10 Minutes

II Apply an appropriate brightening enzyme to the client's buttocks using a fan brush. Ensure the area is fully covered with the enzyme and steam the client until the timer ends. Remove the enzyme with a hot towel, ensuring all the product is gone from the buttocks. Begin your extraction process.

Apply Dermaclara 7" Patches - 15 Minutes

III The buttocks must be completely dry and all product should be removed from this area before you apply your Dermaclara Body Patches. Apply both body patches to the area and ensure proper placement. Offer the client a neck, scalp, or foot massage during this time.

Remove Patches

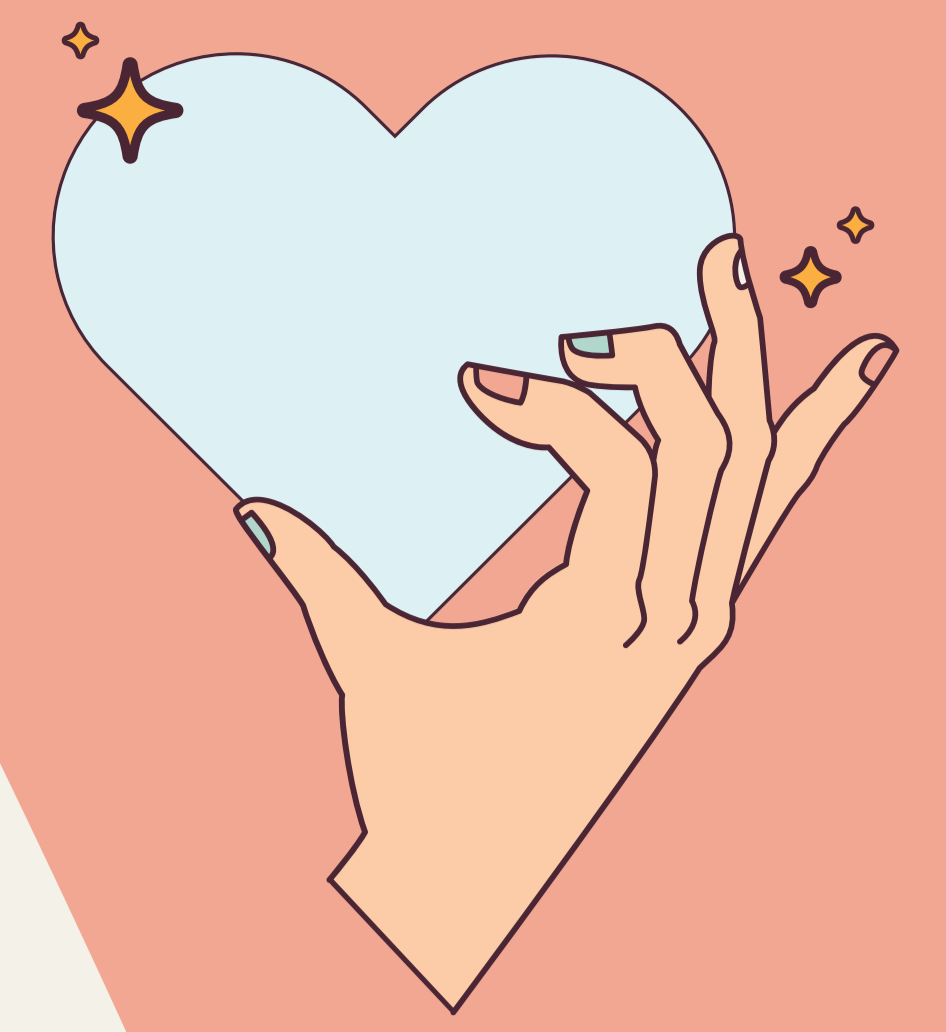

V Remove the Dermaclara patches and store appropriately for the client to take home.

Brightening Mask - 10 Minutes

VI Apply a brightening mask to the area with a fan brush or a hydrojelly mask at this time. Allow the product to sit for 10 minutes. Ask the client if they would like to relax or offer one of the above massage modalities. Remove the mask with a hot towel.

Finishing Products

VII Apply the appropriate brightening body moisturizer to the area and allow it to penetrate the skin.
