

Cable Grippers provide instant toolless height adjustment for drop ceilings, light fixtures, displays, signs and more. Radically reducing installation time and eliminating human error.

Cable Grippers easily slide up and down the cable with a touch of your finger tip.

How Cable Grippers Work

1. Simply push down the plunger and slide the gripper up and down the cable to the desired height.
2. Let go and it stops and automatically grips.

Attach the product you wish to hang. Grippers are available for many different connection methods to hang any suspended items.

Stainless Steel Cable
