

Cleaning and Care Instructions

Thank you for your Challenger Designs purchase. Regular cleaning and maintenance promotes the beauty and longevity of your Challenger Designs products and ensures a lifetime of use.

We recommend regular care and cleaning of your Challenger Designs product to promote product life.

- Routine cleaning can be accomplished by rinsing away dirt and debris. Follow this by gently wiping with a damp, non-abrasive cloth or sponge using warm water. Follow this by towel drying to prevent water spotting.
- If additional cleaning is necessary, mild soap can be used. Caution - The use of Solvents, Abrasives, or Dish Washer Detergent will damage the product's finish.
- Always test any cleaning solution in an inconspicuous area before applying to the entire product.
- A Carnauba wax, which is used in most automotive waxes, can be used on the top surface to help restore shine and promote life.

Do not store objects on the surface for any extended periods of time as these can trap moisture and debris.

Do not place hot items directly on any part of the cart surface. Damage created by hot items can be minimized by cleaning and buffing, but will typically never be eliminated. This type of damage will not be covered under warranty.

CAUTION- Ceramic materials, and other abrasive textures, can cause damage to painted surfaces.

CAUTION - Take care to never let hot ash come in contact with the painted surface of the product. In addition, wet ash can become corrosive over time, so keep all surfaces free of ash debris.

CAUTION - Appliance and stainless steel cleaning solvents are harmful to your Challenger Designs product's finish and should not come in contact with the surface at any time. Take care to spray the solvent onto a cloth and wipe only on the appliance surface.

Minimize the natural aging of your product by storing your cabinet in a dry, shaded area to reduce fading. Both Vinyl and Aqualon (marine-grade) covers are available for many Challenger Designs products. Please contact your local dealer for details.

Light or superficial scratches to the finish are likely to occur during normal use and do not affect the integrity of the product.
