Acrylic bathtubs adopt imported raw materials with plate thickness of 3 - 4.5 mm; the plate color is even, the surface is white and bright for easy cleaning. It has super thermal stability, with no deformation or crack under the temperature difference of - 20~80°C and has good heat preservation effect, with no ice-cold feeling. It is resistant to abrasion and the scratches on the surface can be repaired, and the lightweight is easy for transportation and installation.
