

## MONACO CHENILLE FABRIC

Chenille fabric is a type of soft, plush fabric characterized by its unique texture and appearance, which is created by using chenille yarn. Chenille yarn is made by wrapping short lengths of fibers, called pile, around a central core thread, creating a textured, tufted look.

Cleaning chenille fabric on a sofa requires a gentle approach to prevent damage to the delicate fibers. Follow these steps for the best results:

**Vacuum the fabric:** Use a vacuum cleaner with a soft brush attachment to gently remove dust, dirt, and pet hair from the chenille fabric. Vacuum regularly to maintain the fabric's appearance and prevent dirt buildup.

**Spot cleaning:** If you need to clean a small spill or stain, first test a small, inconspicuous area of the fabric with a mild, water-based cleaning solution. Mix a few drops of mild liquid detergent with cool water, then dip a clean, white cloth into the solution and wring it out so it's damp, not soaking wet. Gently blot the stained area, working from the outside of the stain towards the center. Avoid rubbing or scrubbing, as this can damage the fibers. After cleaning, blot the area with a dry, white cloth to remove any excess moisture.

**Dry the fabric:** Allow the cleaned area to air-dry completely. Avoid using heat or direct sunlight to speed up the drying process, as this may damage the fabric.

**Brush the fabric:** Once the cleaned area is completely dry, gently brush the fabric with a soft-bristle brush to restore its original texture.

**Professional cleaning:** For more extensive cleaning or stubborn stains, it's recommended to consult a professional upholstery cleaner who has experience with chenille fabric. They can use specialized equipment and techniques to ensure the best results without causing damage to the fabric.
