

SYDNEY SECTIONAL

ASSEMBLY INSTRUCTIONS

To Connect Sydney Sectional Sofas Using Toggle Latch Brackets

Connecting the Sections:

1. Locate the Toggle Latches:

Find the toggle latches on the underside of each sofa section. These are typically located near the corners to provide a secure fit.

2. Align the Sections:

Position the two sofa sections so that the toggle latches on each are facing each other.

3. Engage the Latches:

Bring the sections close together and push the toggle on each latch downward to lock the sections into place.

4. Ensure each latch is fully engaged by pressing firmly until you hear a click or feel the latch securely lock.

5. Check Stability:

Once all latches are secured, give a gentle tug or push on the sections to ensure they are firmly connected and do not move apart easily.

Disconnecting the Sections:

1. Access the Latches:

Identify the toggle latches where the two sections are joined.

2. Release the Latches:

Lift the toggle on each latch upward to unlock the sections. You may need to apply a bit of pressure to release the latch, depending on the mechanism.

3. Separate the Sections:

Once all latches are unlocked, gently pull the sections apart. Be careful to handle the sections smoothly to avoid damaging the latches or sofa frames.

Inspect Latches: After disassembly, check the latches for any debris or damage that could affect future connections.

Additional Tips:

1. When engaging the toggle latches, ensure they are completely flipped into the locked position to prevent the sections from separating while in use.

2. Handle the sofa sections with care during assembly and disassembly to maintain the integrity of the frame and latches.
