

SYDNEY VELVET FABRIC**Caring for Velvet Fabric: Tips for Maintaining Your Textured Upholstery**

Poly velvet fabric is a type of velvet fabric made from synthetic fibers, specifically polyester. Velvet is known for its soft, plush texture and elegant appearance, and poly velvet offers these same luxurious qualities while incorporating the benefits of polyester fibers.

Vacuum regularly: Vacuum regularly: Gently vacuum your poly velvet sofa with a soft brush attachment to remove dust, dirt, and pet hair. This helps maintain the fabric's appearance and prevents dirt buildup.

Clean spills immediately: If a spill occurs, blot it gently with a clean, dry, white cloth or paper towel. Avoid rubbing, as this may damage the fabric's delicate fibers. For liquid spills, you can also use a clean cloth or sponge dampened with cold water to blot the area.

Spot cleaning: For small stains, mix a few drops of mild liquid detergent with cool water. Dip a clean, white cloth into the solution and wring it out so it's damp, not soaking wet. Gently dab the stained area, working from the outside of the stain towards the center. Avoid rubbing or scrubbing, as this may damage the fabric's fibers. After cleaning, blot the area with a dry, white cloth to remove any excess moisture.

Dry the fabric: Allow the cleaned area to air-dry completely. Avoid using heat or direct sunlight to speed up the drying process, as this may damage the fabric.

Keep away from direct sunlight: Prolonged exposure to sunlight can cause the fabric to fade over time. Position your bouclé upholstery away from direct sunlight or use window treatments to protect the fabric.

Protect from pets: Keep pets off the bouclé upholstery or use a protective cover to minimize the risk of scratches, stains, or hair accumulation.

By following these care instructions, you'll extend the life of your bouclé fabric and maintain its unique texture and appearance for years to come.
