

1. Open the panel into a cross-shape and attach the hood.
2. Attach the collecting funnel to the bottom of the panel.
3. Set the pyramid-shaped lure basket on the top of the hood. If using a pheromone lure, place it inside the basket before securing.
4. Place a collecting cup on top of the trap assembly.
5. Secure the collecting cup on two corners using the plastic clips. Repeat step 4 and 5 for the bottom, but secure with four clips.
6. Attach the hanging wire to the other two corners of the top cup.
7. Hang on a branch or on a garden stake near the affected crops.
