Fontana-Masson Stain Kit  
(For Argentaffin Cells and Melanin)

Description
The Fontana-Masson Stain Kit is intended for use in the histological visualization of Argentaffin cells and Melanin in paraffin or frozen sections. In addition, the Fontana-Masson stain has been reported to be useful in identifying Capsule-Deficient Cryptococcus Neoformans and typical Cryptococcus Neoformans.

Uses/Limitations
Not to be taken internally.
For in vitro diagnostic use only.
Histological applications.
Do not use past expiration date.
Use caution when handling reagents.
Non-Sterile.

Control Tissue
Any paraffin embedded tissue that contains hair follicles or skin for melanin. Small Intestine for Argentaffin.

Precautions
Avoid contact with skin and eyes.
Harmful if swallowed.
Follow all Federal, State, and local regulations regarding disposal.
Use in chemical fume hood whenever possible.

Procedure
1. Prepare Ammoniacal Silver Solution immediately prior to use. In new or chemically cleaned glassware, mix 27ml Distilled/Deionized water with one vial of Silver Nitrate Solution (10%) and blend completely. Carefully add
Concentrated Ammonium Hydroxide (Not included) one drop at a time, swirling gently after each drop. Initially the mixture will turn dark brown and then gradually become transparent with a fine layer of sediment. The solution is ready for immediate use when all sediment dissolves.

2. Deparaffinize sections if necessary and hydrate to distilled water.
3. Place freshly mixed Ammoniacal Silver Solution in a 58-60°C waterbath and allow adequate time for temperature to equalize.
4. Incubate slide in warmed Ammoniacal Silver Solution for 30-60 minutes or until tissue section becomes yellowish/brown in color. (NOTE: Melanin typically stains in 30 minutes while Argentaffin stains in 50-60 minutes)
5. Rinse in 3 changes of distilled water.
6. Incubate slide in Gold Chloride Solution (0.2%) for 30 seconds.
7. Rinse in 3 changes of distilled water.
8. Incubate slide in Sodium Thiosulfate Solution (5%) for 1-2 minutes.
9. Rinse for 2 minutes in running tap water followed by 2 changes of distilled water.
10. Incubate slide in Nuclear Fast Red Solution for 5 minutes.
11. Rinse for 2 minutes in running tap water followed by 2 changes of distilled water.
12. Dehydrate very quickly in 3 changes of absolute alcohol.
13. Clear, and mount in synthetic resin.
