**HARIO**

# 玻璃王

## HARIO, the King of Glass

At HARIO, we have been dedicated to the design, production and sale of heatproof glass since the company was founded in 1921. HARIO is the only heatproof glass manufacturer in Japan with their own factory.

We started out manufacturing laboratory glassware. In 1948, we expanded our production to household items, starting with a coffee siphon. In 1980 we began producing lenses for automotive headlights. Today, we continue to produce a wide variety of items, from microwave-safe kitchenware and coffee & tea implements, to aromatherapy and pet products.

The name HARIO originates from the Japanese words for glass (玻璃, *hari*), and king (王, *ō*). Thus HARIO (or 玻璃王) means the *King of Glass*: A name fitting with our ambition to become the world's number one glass manufacturer.

The birth of HARIO  
Established in Kiyosumi-shirakawa, Tokyo, Japan, for the production and sales of laboratory glassware.

1921

1921

Started production of laboratory glassware.

1940s

Expanded production to household items, starting with the coffee syphon.

# Coffee Drippers

## V60 Ceramic Colour Drippers 02

VDC-02

Originally released in 2005, the HARIO V60 is loved around the world as a great tool that can help you brew your coffee just the way you like it. Its ease of use makes it a great starting point for people interested in specialty coffee, while its versatility makes it so that you can fine-tune your brew to your precise preferences, extracting all the delicious tastes and aromas from your coffee beans.

But don't just take our word for it: The V60 has been used to win more world brewing championships than any other dripper!

## V60 Craft Coffee Maker Set

VCND-02B

This set includes everything you need to make a delicious pour-over coffee at home or at work. The box also includes an instruction sheet for people just starting out with drip coffee, making it a perfect gift for any coffee lover (including yourself).

Includes:

- 1 plastic dripper (02 size)
- 1 heatproof glass server (600ml)
- 1 V60 filter paper pack (40 pcs)
- 1 measuring spoon (12 gram)

# Coffee Drippers

## Switch Immersion Dripper, 200mL

SSD-200B

Unlike traditional V60 drippers with which coffee is extracted through the constant pouring of hot water, this dripper is specifically made for immersion extraction. The metal ball placed at the base of the dripper blocks water from flowing through, allowing the poured water to stay inside the dripper for two minutes. Then, with the push of a button, the coffee flows down into the coffee cup, allowing for easy, even coffee extraction.

## Switch Immersion Dripper, 360mL

SSD-360B

Do you have guests over? The larger version of the Switch Immersion Dripper let's you brew a large batch right in one go!

**Tip:**

Check out the Switch brewing recipe by the World Brewers Cup champion on page 30!

# Tea Infusion Drippers

## Tea Dripper Largo, 800mL

TDR-80B

The Tea Dripper "Largo" is not just useful, but also decorative, brightening your kitchen or living room with the colours of your tea and herbs. The round form of the pot allows for optimal 'jumping' of tea leaves. Feel like iced tea instead? Just put some ice inside your pitcher and enjoy your cool drink!

## Tea Dripper Largo, 350mL

TDR-35B

The size of this tea dripper is perfect for tea for two. It's not just useful, but also decorative, brightening your kitchen or living room with the colours of your tea and herbs. The opening at the top has been widened to better release the aromas of your tea.

Enjoy the beauty of your tea with the heat-proof glass Tea Dripper "Largo".

# Cold Brew Bottles

## Cold Brew Tea Bottle, 750mL

FIB-75

Enjoy your tea like a fine wine with this design inspired by wine bottles. Switch to a healthy and delicious cold infusion along with your meal. The filter is attached to the spout, so you can pour directly without any hassle. The bottle is easy to clean thanks to its removable parts.

## Cold Brew Coffee Bottle, 700mL

FIC-70

Just add coffee and water! Put the ground coffee in the strainer and attach the filter top. Place the spout on top of the bottle and gently pour in water. Put the stopper in the spout and gently shake the bottle to start the extraction. Now just refrigerate your drink for approximately 8 hours, and enjoy your cold brew!

# Electric Kettles

*V60 Power Kettle Buono N with temperature control*

---

EVT-80-HSV

Even a 1° difference in temperature changes the taste of drip coffee. With this electric kettle, you can adjust the temperature in 1° increments from 50° to 96° to brew the perfect drip coffee. The heating and keep-warm settings are colour coded so you can see the setting at a glance. The water is kept warm for 15 minutes after heating. Various safety features are included: heating stops automatically when the kettle is empty to prevent dry boiling, and the power automatically turns off when the kettle has not been operated for a set amount of time.

## *V60 Power Kettle*

---

EVKB-80E-HSV

There's no need to constantly keep an eye on the stove with this fully electric kettle, and once the water is boiling, the gooseneck spout allows for great pouring control!

# Coffee Grinders

## V60 Electric Coffee Grinder

EVCG-8B

Whether you're brewing pourover, siphon or French Press, the V60 Electric Coffee Grinder has you covered with 44 different grind settings. There is space beneath the receptacle for your V60 Dripper, so you can grind and start brewing straight away. The durable stainless steel burr produces a consistent grind every time.

## V60 Electric Coffee Grinder Compact

EVC-8B

A great cup of coffee starts with freshly ground beans. This electric coffee mill with conical burrs has a wide range of size settings, from ultra-fine espresso grounds to the coarse grounds used in a coffee press. So no matter how you like your coffee, there's a setting for you. The receptacle features a lid to prevent the coffee from scattering.

# Bar Equipment

## Slow Drip Brewer Shizuku

SBS-5B

This drip-style cold brew coffee maker has a consistent pouring speed. Your brew extracts completely in 1 hour, without the need to adjust the speed. This makes the Shizuku super easy to use, and lets you focus on enjoying your favourite cold brew coffee.

## Iced Sake Dispenser

ID-4-SV

Hario's Ice Dispenser is specifically designed to allow you to drink undiluted ice cold sake for long periods of time, as melted ice in alcoholic beverage dilutes the taste. Simply fill the glass container with sake (cold sake recommended), fill the inner core glass container with ice, and let the sake flow out into your cup by letting the bottom of your sake cup press against the tip of the glass weight from the spout. Kick back and enjoy!

## Cooking Pots

### Ceramic Rice Cooker with Glass Lid

GNR-200-B

Discover a whole new way to enjoy cooking with this traditional rice cooker. This cooker allows you to enjoy the most delicious rice right in your own home. The Ceramic Rice Cooker comes with a heat-resistant glass lid that allows you to see the rice being cooked. The cooker itself is made of traditional Japanese ceramic. The lid's knob has a built-in whistle, so you can hear when your rice is done.

### YUKIHIRA IH Stainless Steel Cooking Pot, 2600mL

MIS-26

Create delicious dishes with this beautiful and practical cooking pot. The YUKIHIRA IH Stainless Steel Cooking Pot is beautifully designed and can also be used with induction cooking tops. The pot is very versatile, and can be used for a variety of dishes, like stew, potluck and noodles. The box also includes some recipes to try! The heat-resistant glass lid allows you to easily check on your cooking progress and see when your meal is ready.

# Glass Rice Cookers

## Ichizenya Microwave Glass Rice Cooker

XRCP-1

The sleek design of the Ichizenya Microwave Glass Rice Cooker makes it fit into any kitchen and on any tabletop. This rice cooker can boil your rice in only ten minutes. The glass is also resistant to colour stains and lingering odours, and few parts also mean easy cleaning.

## Microwave Glass Rice Cooker

XRCN-2-B

Cooking rice becomes super easy with HARIO's Microwave Rice Cooker. No Japanese meal is truly complete without good rice. This cooker allows you to enjoy delicious rice that is easily and quickly prepared in your microwave. But you can also cook other dishes, like for example risotto, *takikomi gohan* or curry.

# Dashi Pot & Pickle Maker

## *Dashi Pot*

---

DP-600-W

The Dashi Pot allows for easy extraction of stock in your microwave. The large strainer reaches to the bottom of the pot, ensuring that stock is extracted thoroughly, and can also be hooked onto the top of the pot to extract every last drop. The wide opening improves hygiene by allowing for easy cleaning. Comes with original recipes.

## *Tsukemono Glass Slim*

---

TGS-800-T

*Tsukemono* are Japanese pickled vegetables, eaten as tasty side dishes with a meal, or when having drinks. In Japan, many people make their own *tsukemono*, for example from ginger, daikon (Japanese radish), plum, cucumber or Chinese cabbage. HARIO's *Tsukemono Glass Slim* allows you to easily prepare traditional *tsukemono*, or to try and create your own recipes!

## Drinkware

### Twin Beer Glass, 380ml

TBG-380

Enjoy a nice cold beer with this beautiful double-layered heatproof beer glass! The double-layered glass prevents condensation build-up for cold drinks, and makes hot drinks easy to hold! The brim is single-layered, meaning you can be sure of the temperature before you drink.

### Sake Cooler Maru Chirori M

IDX-2MSV

A sake decanter that keeps your drink cold without diluting it.

The compartment for the ice is separate from the sake, meaning it will be cooled, but any melted water will not mix in with your drink.

The beautiful design, made with heatproof glass, makes this decanter a great centerpiece for your table, as well as being practical.

# How To Brew V60 Coffee

*Interested in specialty coffee, but don't know where to start?*

2021 World Brewers Cup champion **Matt Winton** shares his favourite recipe to help you get the best out of your beans!

## Matt's Switch Immersion Recipe

### What do you need?

16g coffee (fairly coarse grind)

240mL water (93 °C)

### How to brew:

1. Rinse the filter paper and add the coffee.
2. Pour 50g of water for the bloom, with the Switch open.
3. Close the Switch after 30 seconds, and pour water up to 240g.
4. At 3:00, open the Switch again.
5. Remove the Switch at 4:00.

### Tip:

Want to brew more in one go? Try this recipe with the 03-size Switch, using 24g of coffee and 360mL of water.

## Brew along with Matt!
