EDUCATION

**Purpose-driven STEM
education for a brighter future**

Forward EDU takes a unique approach to teaching STEM. Students learn about climate issues while coding prototypes of their technology solutions.

The learning systems comes with everything a teacher needs from the hardware to curriculum aligned lessons and step-by-step coding and building tutorials.

Our Product Ecosystem

Climate Action Kit

\$225

Grades 3 to 12

20+ Online Lessons

Smart Vehicles

\$85

Grades 7 to 12

6+ Online Lessons

Smart Farming

\$45

Grades 5 to 8

3+ Online Lessons

Wind Turbine

\$45

Grades 3 to 6

3+ Online Lessons

Prices listed in USD

Climate Action Kit

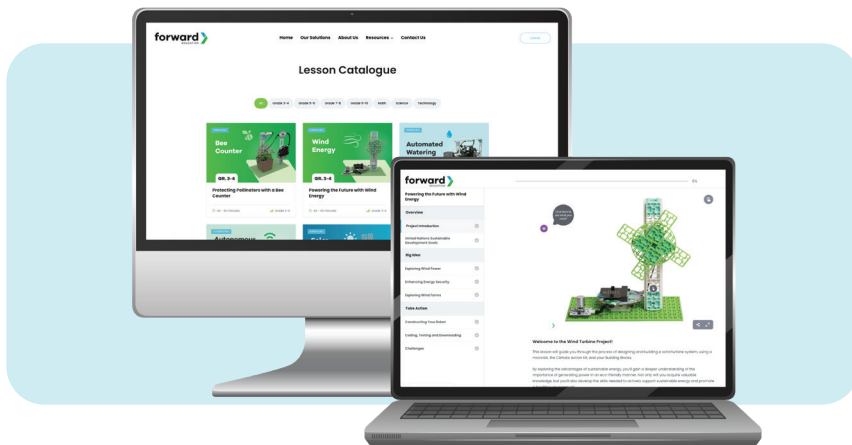

The kits include all the sensors, motors, building blocks and components to complete a variety of lesson-based projects on multiple topics.

- ✓ Everything in the box
- ✓ Reversible cable connectors
- ✓ Intuitive building blocks
- ✓ 2-year warranty
- ✓ Smart components
- ✓ Powered by the micro:bit

Learning Platform

Each kit includes access to our online learning platform featuring classroom-ready lessons and extensions for grades 3 to 12.

Curriculum Aligned Lessons

Lessons are connected to various curriculum standards.

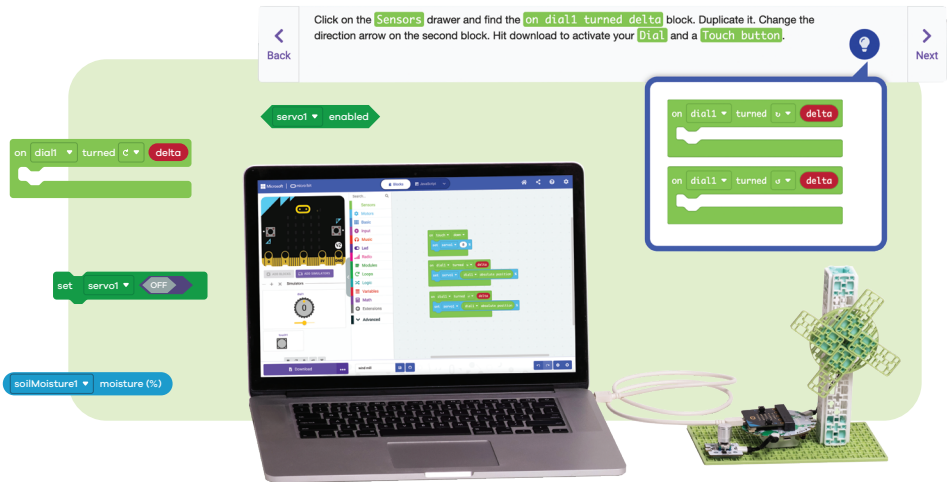

Teacher Training Resources

Certification courses for educators to confidently teach STEM and computer science.

Coding Tutorials

Follow step-by-step coding tutorials and building instructions to create working projects with challenges for advanced learners.

- ✓ Test code in real-time with live simulators
- ✓ Switch between Block Code, Python, or JavaScript
- ✓ Audio prompts available in each tutorial

Easy-To-Use

Intuitive hardware and step-by-step tutorials

Maximize Class Time

Single-class lessons, backed with a 2-year warranty

No Student Login

Easily access content through a login-free browser-based platform

Differentiated Learning

Accessible and challenging for all learning levels

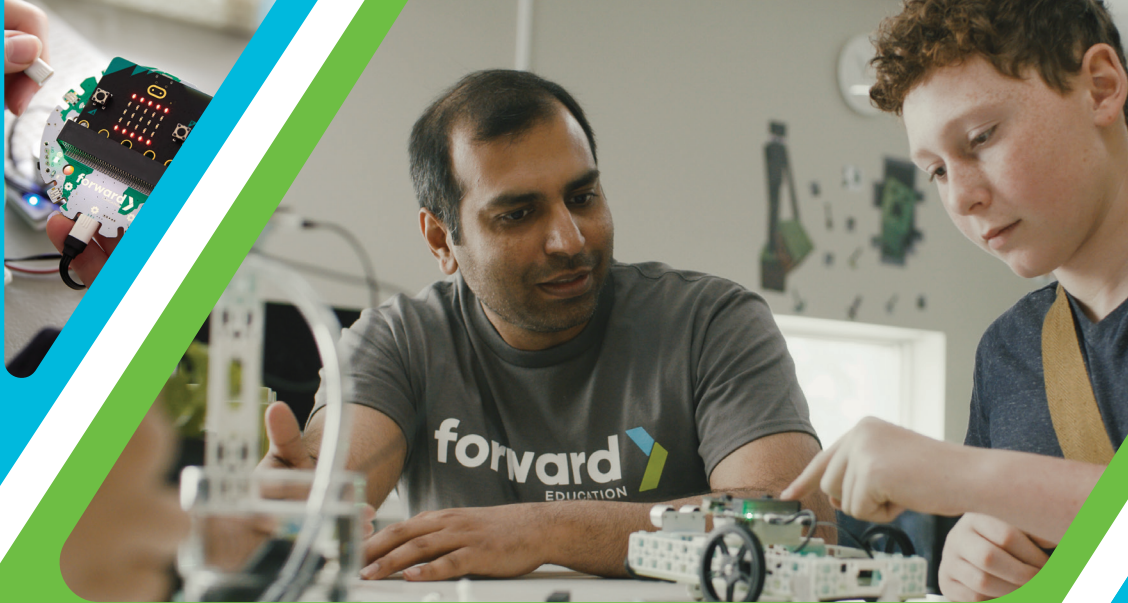

Curriculum-Aligned

Aligned to various curriculum standards

Grades 3 to 12

Support students as they grow with a learning continuum
